### **FIRDARIA (Nodal Variation)**

#### **Planetary Period: The Sun**

*From 31 May 1930 to 4 Nov 1931*

*Age 0.0yrs to 1.4yrs*

The quality of this period of life varies depending on whether or not you were born during the night or day. Generally speaking it is a positive phase.

If you were born during the night then you experience the shining influence of the Sun's rays in your mid 40s. You have been reassessing your life goals and making the necessary changes. This can range from something as simple as spring cleaning your house, to a more serious change of career or relationship. After a period of letting go and perhaps experiencing a sense of loss, you are now ready to move forward and shine in your life. Opportunities arise in all areas of life. People from all walks of life are ready to help you achieve your personal and professional ambitions. You have the opportunity to live a rich and rewarding life with appreciation from other people.

If you were born during the day then you experience the positive influence of the Sun's rays from birth, and then again in your mid 70s if you live that long. Depending on other influences in your birth chart, you are likely to have a rewarding childhood. Your parents dote on you in early childhood, helping you to experience a good sense of self. You may experience some hardship in the first few months of life, according to the ancient astrologers, but this quickly passes. You are a joyful and happy child with loving parents. Later in life you can enjoy the company of friends and your children. The ancient astrologers say that you will have good fortune, a full life, and quiet. Of course other astrological influences could indicate contrary influences. Modern astrologers would state that your early life is a period when your father is a major influence, either positively or negatively depending on the position of the Sun in your birth chart.

#### **Planetary Period: The Sun subperiod Venus**

*From 4 Nov 1931 to 9 Apr 1933*

*Age 1.4yrs to 2.9yrs*

If you were born during the night then this phase indicates that you are likely to experience pleasure in all of your activities, but particularly those involving women, the arts, diplomacy and beauty. For this reason you are likely to concentrate on pursuing projects and people who offer you the opportunity to increase your sense of well being. If you are married you enjoy a renewed sense of fun and fulfillment. If you are single you may meet a potential partner and plan a wedding. The ancient astrologers claim that you could make a profitable journey. Therefore you may travel to another place in order to pursue a pleasurable pastime or a

significant relationship. You may discover that you are artisan and take up a new hobby that involves the arts, crafts, beauty or fashion. Your finances are also likely to flourish. In general you feel and act in benevolent ways. In turn others are also generous to you.

If you were born during the day then this period occurs early in your life then you are likely to enjoy your first bonds with other people. Relatives and friends are likely to dote on you. You may also welcome a sibling into your family. Hopefully this is a positive time where you learn that life can be fun and pleasurable. However, this could depend on other aspects of your birth chart. Whatever your circumstances it is time for you to learn how to interact with others. These skills will influence you for the rest of your life.

### **Planetary Period: The Sun subperiod Mercury**

*From 9 Apr 1933 to 13 Sep 1934*

*Age 2.9yrs to 4.3yrs*

If you were born during the night, then this is a busy time, and you are well advised to make the most of the opportunities that arise. In other words it is time to get down to business. In the previous year or so you have been having a wonderful time, enjoying the pleasures of life. Now you need to concentrate on matters at hand. You may need to make some decisions in either your private or professional life. Either way you are required to gather information, communicate clearly and sign on the dotted line. Matters such as personal interactions, business plans, contracts and marketing plans need attention. If you do not pay attention to these details you may be faced with lawsuits or other such obstacles. This is an excellent time to launch a new project, sales or marketing plan or business. Networking skills come in handy right now. It can be surprising to note what great projects start over a morning coffee chat. The seeds of ideas can now be put into action. Decisions regarding your home, family and financial matters are also highlighted. The more time you spend ensuring that you are well equipped in all areas of your life, the more that you will feel emotionally satisfied in the next phase.

If you were born during the day then you undergo these planetary influences at a young age. Ideally the adults in your life are able to tune in to your needs and help you grow in a positive and healthy manner. This will depend somewhat on other influences in your birth chart. However, it is time to start communicating. The people around you shape the way that you learn, speak and perhaps read at a young age. It is a good time to start some type of childcare or schooling, as long as the most suitable place for you can be investigated and booked. Friendships formed now can also have a strong affect on your young life. During this period you are learning about the world, and making decisions that can last a lifetime.

### **Planetary Period: The Sun subperiod The Moon**

*From 13 Sep 1934 to 16 Feb 1936*

*Age 4.3yrs to 5.7yrs*

If you were born during the night then you experience this influence of the Sun and Moon during your late 40s. It is again time to reassess your personal goals in the light of the last few years. Many doors have opened in the last few years and you have been able to enjoy the privileges of other people's support, both financial and emotional. Now you need to take a little more care with your resources. Do you have the resources to carry you forward into the next phase of your life? Do you need to invest a little time and money in those who have supported you? You may find that your circumstances are changing and that you have to adopt the role of supporter and nurturer for a while. The more that you are able to adapt and balance the needs of loved ones with your own, the more that you are able to reap the rewards

from this period. On a slightly different note you may also like to change your diet, exercise regime and have a health check up.

If you were born during the day then you experience the influence of the Sun and the Moon during your early childhood. During this period your life changes, as does your relationship with your mother and father. The most likely cause is that you start your schooling. Generally speaking this is a period during which you discover more of your own independent self. Ideally you discover your own truths, taking guidance from parents, caregivers, siblings and teachers, however it is probable that the adults in your life are largely in control of the changes that are occurring in your life right now. You are sensitive to your surroundings and need caregivers who are able to tune in to your needs.

### **Planetary Period: The Sun subperiod Saturn**

*From 16 Feb 1936 to 22 Jul 1937*

*Age 5.7yrs to 7.1yrs*

This is a challenging period of life during which you are forced to slow down and make sure that the foundations of your life are solid. It is the ideal time to make changes in your diet and exercise regime, and to have a health check.

If you were born during the night then you experience this around 49 or 50 years old. You may have the responsibility of caring for aging parents. Subtly the roles have been changing over the past few years and now you realize that you need to take charge. If your parents are not involved, then other responsibilities are likely to arise. If you have always been a responsible person then perhaps it is now time to learn to care for yourself, put yourself first and achieve some of your own ambitions. If you have led a carefree life then perhaps you will now find settling down more rewarding. Only you can know the answers, however the lesson is clear - put the effort in now to reap the rewards later.

If you were born during the day then you experience this period when you are 5 years old. The structure of your life is changing. It is time to separate a little from your parents and settle in to your school life. The planet Saturn and the Sun may be a challenge in your birth chart. As such you may experience this period as a difficult one in relation to your father, or another male authority figure in your life. It is a time when your father needs to offer support and guidance rather than imposing his will on you. As a result you learn healthy limits while still feeling able to express your own needs.

### **Planetary Period: The Sun subperiod Jupiter**

*From 22 Jul 1937 to 26 Dec 1938*

*Age 7.1yrs to 8.6yrs*

Generally speaking this is a fortunate period whether you experience this period at the age of 7 or in your early 50s.

As an adult your fortunes improve in all areas of your life, but particularly in health and wealth. As a result you are happier, which in turn attracts more opportunities for expansion and quality of life. You are delighted to be achieving your goals. This is particularly so if you have used the last year or so to work towards your goals. If you have tried to cut corners then you may now be required to correct some of your errors. Hopefully you have used the previous period to lay some solid foundations and now you can fully reap the benefits. Your colleagues, friends and family are likely to hold you in high esteem right now, recognizing your true worth. This period is likely to be a highly beneficial one, but there are some

exceptions. If you have acted immorally in previous periods of your life then ancient astrologers state that you could have a spectacular fall from grace. If you have acted with integrity throughout your life then you are likely to easily attract good fortune.

At the age of 7 you are likely to enjoy your life. Having settled into a new routine now you can relax and enjoy new experiences. It is possible that you spend time with your grandfather or his side of the family. You may enjoy your schoolwork; discover a new hobby or a new circle of friends.

### **Planetary Period: The Sun subperiod Mars**

*From 26 Dec 1938 to 31 May 1940*

*Age 8.6yrs to 10.0yrs*

The planet Mars often indicates a change of direction. So now is the time for you to make changes so that your life is more truly reflective of your personal goals. Are you living the life that you have really wanted to? If so then this is an opportunity to really forge ahead with your ambitions. If not, then you need to reassess.

If you have a "nocturnal" chart then you are likely to be restless, yearning for some excitement in your life. You may make some sudden change, or a twist of fate may surprise you. If you are single then perhaps you marry during this time, or travel to a far off land. Ancient astrologers warned of quarrels with animals and people. Therefore you need to be wary of abusing those around you in your efforts to get ahead. You may be restless, but your loved ones may not share your enthusiasm for greener pastures. Weigh up the consequences of any actions as well as you can before proceeding.

If you experience this period as a child then you are likely to also be enjoying new activities, perhaps associated with animals. This will depend on other aspects of your birth chart.

Whether born during the night or the day, you are likely to experience a sudden change of fortunes towards the end of this period. This is will test your true mettle. The process of self-discovery may be somewhat challenging, but you are likely to rise to the occasion.

### **Planetary Period: Venus**

*From 31 May 1940 to 22 Jul 1941*

*Age 10.0yrs to 11.1yrs*

The ancient astrologers consider the planet Venus to have a very positive influence on people's lives. Therefore, they say that this is a happy period of your life whether you experience it at the age of 10 or 54. Either way you are joyful, enjoying pleasurable pastimes in solitude and company.

As a child, your family's financial circumstances are likely to improve. As a result you are likely to enjoy more material comforts. Perhaps you will also start receiving your own pocket money and therefore delight in some financial independence.

As an adult your income is likely to increase, therefore giving you even more reason to rejoice. If you are single then you are likely to be introduced to someone significant, perhaps even more than one person. You may have a choice. If you are married then you are likely to enjoy a new period of romance and pleasure with your spouse. You may discover an artistic talent during this phase, or perhaps you will simply take greater pleasure in your current tasks. People in high places are likely to help you achieve your desires. Right now you can

enjoy yourself, so make the most of the opportunities that come your way.

**Planetary Period: Venus subperiod Mercury**

*From 22 Jul 1941 to 13 Sep 1942*

*Age 11.1yrs to 12.3yrs*

Whether you experience this combination of planets at the age of 11 or 55 it is difficult to focus on practical matters right now. You are more likely to be distracted by the pursuit of pleasurable activities or enjoyable friendships.

As an adult it is time to reassess your options, in particular those relating to friendships and finances. Friends may be somewhat unreliable during this period. You need to apply reason rather than emotion to those close to you. Your loved ones may be undergoing a period of personal upheaval that is affecting their relationship with you. You need to reassess whether or not the changes are permanent or temporary. You may also discover an artistic talent such as writing, acting, drawing or teaching. It is possible that you are also changing your mind about how you earn your money. Consequently you may change jobs. You may even move to another country in pursuit of a better lifestyle or a loved one. Try not to be too scattered during this period. If you can remain calm and make logical choices then you are more likely to achieve emotional satisfaction in the next phase of your life.

As a child you may have the opportunity to enjoy new hobbies, join a club or even change schools. Whatever the scenario you are now able to fully enjoy your pastimes and friends.

**Planetary Period: Venus subperiod The Moon**

*From 13 Sep 1942 to 4 Nov 1943*

*Age 12.3yrs to 13.4yrs*

Femininity is highlighted during this phase. Whether you are male or female, 12 or 56 years old, you are likely to be drawn to women and the feminine arts. The Moon and the planet Venus are combining to entice you to enjoy your life more. Pleasurable activities are likely to hold more attraction, particularly feminine ones such as beauty treatments, the arts and fashion.

As an adult you are feeling much happier now because you have able to concentrate on one thing at a time. Life has been a bit confusing in the past year or so, but now you are starting to settle down and reap the benefits of your past decisions. This is likely to be a happy phase of your life during which your friends, colleagues and loved ones appreciate and support you. In turn you are able to enjoy their company. Your social standing may improve reaping benefits for your private and professional life. If you are married then your relationship with your spouse is likely to blossom during this phase. If you are single then you may meet someone significant, perhaps even plan an engagement or marriage. Finances are also likely to improve now adding to your personal satisfaction. In a woman's chart this can indicate a beneficial time to have a health check.

As a child you are likely to be feeling the first stirrings of awareness of the opposite sex. Your social circle is changing, as are your expectations of friends. Perhaps love is in the air, or perhaps you are simply challenging your own beliefs about gender. As a young girl this is a beneficial time to learn about the cycles of the female body.

**Planetary Period: Venus subperiod Saturn**

*From 4 Nov 1943 to 25 Dec 1944*

*Age 13.4yrs to 14.6yrs*

The focus is currently on how comfortable you feel with the people in your life. Your relationships with friends, relatives and your primary partner need to be consolidated. If you neglect your loved ones right now, then it is at your own risk.

If you were born during the day then you will experience this when you are in your mid-teen years. As such your circle of friends may change during this period. It is also possible that you form a deep and lasting bond with someone. This may be a friendship or it may be a bond that lasts for a long time, a mentor or friend who influences your life. It is also possible that you change school or home. You may feel a little awkward or shy. Your challenge is to believe in yourself and your ability to form positive friendships with people of all ages.

If you were born during the night then you are likely to experience this in your mid to late 50s. Therefore you are likely to be reassessing your associations in the light of whether or not you wish to maintain a connection in the latter half of your life. Serious consideration needs to be given to past mistakes and current needs. You are also likely to reconnect with people from your past. This can be a pleasant or unpleasant experience, depending on the nature of the relationship. For instance if you are single then you may meet an old friend and marry. If you are single then you are likely to seriously consider your marital status. You will either decide to remain single and settle down happily on your own, or you may seriously search for a partner. It is also possible that you decide to end a serious personal or business partnership. If this is the case then you need to be very careful of legal ramifications. Legal matters need to be dealt with now. It is also time to get serious about your finances. Your financial security and independence can be attained now by careful planning and action.

**Planetary Period: Venus subperiod Jupiter**

*From 25 Dec 1944 to 16 Feb 1946*

*Age 14.6yrs to 15.7yrs*

You have just been through a somewhat serious period, during which you were reassessing your relationships. Now you can lighten up and enjoy a more favourable social life.

Whether you are a teenager or in your late 50s, the emphasis is on social contacts, expanding your hobbies and generally having some fun. It is time to try some new hobbies, set some new goals, reassess your finances and expand your horizons. You may travel, start a new study course or simply take ballroom dancing classes. Make sure that you enjoy whatever activity you choose. Otherwise you may have some difficulty settling down to the more serious tasks in your life. Satisfaction will come more readily if you set yourself some clear goals, ones that incorporate achievement and fun. As your social circle expands and your self-esteem starts to improve then your self-confidence is impressive. You enjoy associating with people with common interests and goals, and they also enjoy your company. If you have had aspirations to hold a prominent position in society then now is the time to seek support for your aspirations. Spread your wings and fly a little.

**Planetary Period: Venus subperiod Mars**

*From 16 Feb 1946 to 9 Apr 1947*

*Age 15.7yrs to 16.9yrs*

If the previous period was a time to spread your wings and fly a little, then now is a time to change direction. For reasons beyond your control others are no longer able to support you as much as they were. So you have to become a little more self-directed.

If you are experiencing this combination of the planets Venus and Mars at the age of 15 or 16 then perhaps you are striving for more independence, clashing somewhat with those in authority and having difficulty finding the right balance between self-assertion and consideration for others. It is also possible that your relationship with your father, or another significant male, is at the root of these challenges. You would do better to seek the counsel of a wise and trusted woman, rather than rely on the men in your life right now. It is time to find your own way through assertion not aggressions.

If you are experiencing this period during your late 50s then it is a time of conflicting desires when it comes to relationships. Perhaps your relationship with your father plays some part in this conflict, however; it is likely that you are undergoing a change of heart. You need to be wary of pursuing fame and fortune at the expense of your loved ones. During this period you need to reassess your most important relationships, the way that you relate to your loved ones and the time that you allocate to those closest to you. If changes need to be made then now is the ideal time. Otherwise you are likely to experience problems, particularly in your relationship with women. It is not the right time to be entering into a senseless battle of wills. Or as advice columnist Ann Landers said, *"All married couples should learn the art of battle as they should learn the art of making love. Good battle is objective and honest, never vicious or cruel. Good battle is healthy and constructive, and brings to a marriage the principle of equal partnership."* Right now the concept of equal partnership is being thrust on you in all areas of your life. You would be wise to take heed.

### **Planetary Period: Venus subperiod The Sun**

*From 9 Apr 1947 to 31 May 1948*

*Age 16.9yrs to 18.0yrs*

This period is one in which you reap the consequences of previous decisions. If you have applied yourself to acting responsibly then you are likely to enter the next phase of your life with the support of loved ones, and the knowledge that you have done your very best.

If this is occurring in your teenage years then perhaps you are facing decisions regarding your future choice of work, as well as the type of relationship that you would like. If you are currently in a relationship, and you have not allowed it to detract from your studies then you are likely to benefit from your choice. However, if you have allowed yourself to be misled against your own morals by a lover then you now have to face the consequences of those decisions. The more that you embraced the lesson of equal partnership and responsible action in the previous phase, the more positive choices you have available to make now.

If this is occurring at the age of 60 then you also now realize that you soon have to make decisions and changes and these are largely affected by past actions. If you have been clashing with other people in previous years, and acting with integrity then now you may be ready to move on, knowing that you have done your best.

On the whole this is a positive phase, so it is unlikely that you experience dire consequences. In fact you may reap many rewards. This can be a very happy time of life, during which your good fortunes are multiplied. Ancient astrologers say that you may be the victor over your adversaries, and that you will be associated with kings and queens and rise in nobility and power!

Whatever your age now is the time to take stock of your finances and the lessons learnt regarding relationships, and prepare for a new phase of your life.

**Planetary Period: Mercury**

*From 31 May 1948 to 9 Apr 1950*

*Age 18.0yrs to 19.9yrs*

You may experience the influence of the planet Mercury at the age of 18 or 62, depending on what time of day you were birth. Either way, you are about to undergo some changes in your lifestyle. This could be in your daily life, or perhaps in your profession. It could simply be a change of pace, or a more significant change in your life. Perhaps you begin a study course, or move to another neighbourhood. This is the ideal time to learn new skills and how to apply these skills whether you are planning the start or end of a career or lifestyle. You may a choice of several options which you find exciting and stimulating or you could feel restless and unsure of your course of action. Remind yourself that change can be refreshing and exciting.

Ancient astrologers say that the strength of your planet Mercury will determine the outcome of this period. If you have a good, strong Mercury then you are likely to enjoy the changes that occur, however; if your planet is debilitated in some way then you may struggle with your lessons. Either way you need to explore options and remain open to new possibilities. Feel free to change your mind, but not so much that indecision and changeability hinders your chances of success. Do not squander your opportunities. You need to make decisions that help you focus on the here and now, and not the past.

**Planetary Period: Mercury subperiod The Moon**

*From 9 Apr 1950 to 16 Feb 1952*

*Age 19.9yrs to 21.7yrs*

Whether you are young or old when you experience this period, you could feel a little unsettled. Something or someone may be compelling you to make changes. It may even be the voice of your own conscience that is urging you to try new things. Either way it is time to embrace these opportunities to change your habits or lifestyle even if you don't know where to start. Just take things a step at a time, but don't dig in your heels and refuse to change even if at times you perhaps feel a little overwhelmed. Try to make decisions that increase your sense of wellbeing. In other words, rather than reacting with heightened emotions try to concentrate on making a calm, considered response. A significant female relative or friend could call on you for support. Once again you may not welcome this cry for help. Do what you can to help but ensure that you also take good care of your own mental health.

It is fair to say that the more that you enjoy yourself and try to forget your troubles, then the more that you can enjoy this strangely erratic period of your life. Eat, drink and be merry and make sure that you don't become careless or reckless. You may feel unsettled if you try to commit to one path. This is more likely to be a time when you want to explore all of your options. Follow your intuition because on a more positive note you have many opportunities to enjoy different aspects of your life. Your career choices may become more stimulating, offering you a chance for a change of scenery. If you are single you may meet a significant partner, someone who challenges you to make different choices in your life. If you married then you and your partner may need to learn different ways of communicating or start a new hobby. You may make decisions that affect your loved one, or vice versa. If you experience the influence of these planets during your sixties then you may decide to retire from your job. This period can be both unsettling and exciting.

**Planetary Period: Mercury subperiod Saturn**

*From 16 Feb 1952 to 26 Dec 1953*

*Age 21.7yrs to 23.6yrs*

After a period of experiencing many opportunities and options, and perhaps feeling a little tense, you are now able to settle down. You have a clearer picture in your mind's eye of the opportunities that abound in your life and now you are required to make some choices. It is time to seriously consider various aspects of your life.

If you were born during the day then you are experiencing this period during your early twenties, and you may face choices about jobs and careers. It may be time to sign a work contract, move home in order to accept a job offer or accept more responsibility in your current job. You are unlikely to receive promotions or recognition right now. Instead you are doing your apprenticeship, putting in the effort that will reap rewards later. You may decide to strike out on your own, setting up your own business. Right now you are required to put in work behind the scenes, make careful plans, market and promote your product without necessarily seeing instant results. If you have done your homework then persistence is likely to pay dividends in the long run.

If you were born during the night then you experience the influences of these planets in your mid-sixties. If this is the case then you are likely to be making some serious decisions regarding your retirement. Either way it is now decision-making time. You need to commit to a particular course of action, or perhaps to another person. When faced with life-changing decisions you may have to face your fears and determine the difference between realistic caution, and unfounded fears that are standing in your way. Contracts are likely to feature, and you may need to make plans and decisions regarding your finances and investments.

On a slightly different note, ancient astrologers say that this can be a time of moving to another country, a long journey. Whatever your course of action you are sowing the seeds now in order to reap the benefits in the next period. As Susan Jeffers says in her best-selling book title, "Feel The Fear and Do It Anyway".

### **Planetary Period: Mercury subperiod Jupiter**

*From 26 Dec 1953 to 4 Nov 1955*

*Age 23.6yrs to 25.4yrs*

You can now reap the benefits of the past year or so. Hopefully you have been working hard and shouldering your responsibilities. Right now you can see light at the end of the tunnel. You are likely to have an active mind during this period as well as a yearning to expand your horizons.

If you are experiencing the influence of these planets in your 20s then you are likely to reassess your hopes, dreams and wishes and to enlist the help of your peers and elders. An event may trigger a change of heart and this is a beneficial time for receiving wise counsel from other people. If you are bored then it is time to plan a new and more satisfying lifestyle. You may be ready to travel, really enjoying the planning stages as much as the actual journey. During this period you could also receive some good news - a promotion, an award in recognition of your hard work, or a generous offer from an associate or friend. It is also possible that you make a joyous announcement or send out invitations for a celebration. This could include announcing your intention to marry or perhaps the birth of a new child or project. Promises are easily made, but keeping them is often more difficult. It is important that you are true to your word right now. The more that you honour your commitments then the more rewards you are likely to receive. These could include the opportunity to study,

teach, write, and publish articles or travel.

If you are going through this phase in your 60s then much of the same is true, however; you are more likely to be considering how to make the most of your retirement. Travel plans may be highlighted, or you could be deciding how to spend your leisure time in other pursuits. Children may feature in your life now, as you enjoy being a grandparent or perhaps acting as a mentor for young people.

Either way this is a positive phase of your life during which you are encouraged to make the most of your opportunities.

### **Planetary Period: Mercury subperiod Mars**

*From 4 Nov 1955 to 12 Sep 1957*

*Age 25.4yrs to 27.3yrs*

Restlessness may be a key feature of this phase of your life. This is because you are ready for change but you are not quite sure what path to choose. Choices need to be made. As a result this can be a time of conflict, either within yourself or with other people. You need to move forward with your life goals, but if you cannot exercise tolerance then misunderstandings and arguments are hard to avoid.

You may be experiencing the influence of these planets in your mid-twenties. If so then you are likely to feel the urge for independence. It is time to pursue your own career path, move out on your own, travel, start your own family or business or any other venture that propels you into new fields. You would be well advised to heed the advice of wise elders, and to avoid wasting your time with people who do not have good intentions. Save your energy for those who are important to you. Try to improve the lines of communications rather than leap from one argument to another. Otherwise you risk doing irreparable damage to significant relationships.

If you are undergoing this phase of your life in your late 60s then you are likely to face a few tough decisions regarding your independence. Can you still afford to live in your own home? Do you need to move to smaller accommodation? Is it time for that world trip? Is there any paperwork that you need to address now? Are you spending enough time pursuing your own independent interests or are you looking after others?

This period can bring the need for difficult decisions. Ancient astrologers also state that this period can signify a change in your relationship with a parent or spouse. On a brighter note you now have the energy and desire to sort out problems that have been lingering and to pursue your own personal goals. At first this freedom may be unheralded and unwanted, but soon you will revel in your newfound independence.

### **Planetary Period: Mercury subperiod The Sun**

*From 12 Sep 1957 to 22 Jul 1959*

*Age 27.3yrs to 29.1yrs*

The last year or so may have felt a bit challenging, but if you have faced the challenges and made the necessary changes in areas of your life, then you are ready to shine. Now life lightens up and some joy returns. Whether young or old, this is an exciting time of increased opportunities and creative ideas. Your social contacts are likely to increase. In fact all forms of communications are busy as you make plans, discuss ideas and network throughout your community of friends, family and colleagues. A project may boost your social standing and

bring great personal satisfaction.

In your twenties these planets impress the need for change in your life. You may have felt that the last few years have already been changeable enough, but now you are ready to embrace the new adventures. You may need to consult an astrologer regarding which areas are highlighted during this period because connections to your Sun sign and the houses of your birth chart are significant. Traditional astrologers say that this period can highlight a change in the relationship with an older brother or gifts from elder statesmen.

In your early 70s this period is also one of change. At a time when you may feel like you would like a quiet life, this is unlikely to be the case. If you are healthy and active, then you are well advised to embrace this opportunity for stimulation and have some fun. This may also be your opportunity to teach the young ones a thing or two. Enjoy your grandchildren, or other people's children if you don't have any of your own. You have much wisdom and experience to impart and this is your time to bask in the sunshine of other people's appreciation.

### **Planetary Period: Mercury subperiod Venus**

*From 22 Jul 1959 to 31 May 1961*

*Age 29.1yrs to 31.0yrs*

Life continues on its merry way but now you are likely to attract more women into your life - friends, associates, female children and relatives. You may find that you feel somewhat alienated from men but will enjoy the company of women.

This is a significant turning point if you are experiencing this influence during your late 20s and early 30s. Decisions now, either your own or someone else's, are likely to affect the course of your life. Marriage may be significant with you either marrying, or forsaking a lover who lacks commitment. You are ready to make decisions regarding your love life, although others may not be quite so dependable. Focus on the type of union that you want and you may be happily surprised! Favours, promotions, ideas and rewards are likely to come from associations with women. Therefore you might like to explore making contacts with women during this period by joining women's groups or by working with or for women.

If you are experiencing this period during your 70s then this is also likely to be a time when you are focusing on your marriage, your memories, relationships with loved ones and your finances. It may be time to make some financial decisions. Equity and property investments may need a little reshuffling to further enhance your lifestyle.

This is likely to be a busy period with a full social calendar. In many ways this period signifies the end of one phase of your life and the beginning of another. Right now you might be too busy to fully appreciate the significance of the changes, but later you are likely to reflect on this turning point.

### **Planetary Period: The Moon**

*From 31 May 1961 to 12 Sep 1962*

*Age 31.0yrs to 32.3yrs*

Change is the key factor in your life. Right now your life is about to change in ways that you cannot begin to imagine. This can be welcome, or it can be a little unsettling depending on other factors in your astrology chart. Your association with women continues in this period, but your life changes in other ways. You are likely to undergo a series of highs and lows as

you adjust to the changes. The rhythm of your life fluctuates. Some times you experience joy and some times sadness. It is somewhat like when a first child is born. This is both an exciting period during which you welcome a new soul into the world, experience intense love and joy however; there may also be a little sadness for an independent single lifestyle that is left behind.

If you go through this during your early 30s then you may decide to move house, get married, start a family, or renovate your home. If you already have children then you may have to focus more on them right now. You may also give birth to a new project, something close to your heart. You may also renovate or move house, form a strong bond with mentors and parents or make your life more comfortable in other ways. If you do renovate or move house then you are likely to benefit from the sale of property. You may also enjoy going on a holiday or moving to an entirely new location. You are likely to be healthy in mind and body and well able to make the most of the ebb and flow of your life right now.

If you were born during the night, then you are likely to experience the influence of the Moon twice in your life. Firstly as a young child, and then again in your mid 70s. If you go through this in your mid 70s then you are likely to feel an urge to change your living arrangements. The emphasis right now is on comfort. What makes you most comfortable?

The astrological house and sign of your Moon gives clear indicators of how you can make your life easy right now, the changes that you are likely to seek in your personal life. Contentment is the key.

### **Planetary Period: The Moon subperiod Saturn**

*From 12 Sep 1962 to 26 Dec 1963*

*Age 32.3yrs to 33.6yrs*

After a period of change you are now able to settle down. If you have been unsettled in specific areas of your life then you are now able to establish more routine and stability. This could be through a change of attitude, a change of circumstance or through the ability to now incorporate daily habits that are more stable and comforting. It is a beneficial time to break old bad habits and incorporate new, healthier ones. You now have the willpower to apply to anything that you set your mind to. Embrace activities, projects and people who boost your self-esteem. Rely on your own judgment, even in the face of opposition, and you are likely to succeed, even if it is a little hard going at times. It is important that you look for a sense of security in your own life rather than searching for someone else to satisfy your needs. You may make a commitment to a loved one, either an undertaking to shoulder responsibility or perhaps a promise of marriage, however; you would be well advised to carefully consider any long-term commitment.

When the steady planet Saturn comes together with the changeable Moon, then the structures of your life could change. If you are experiencing this period in your early childhood then your relationship with your parents is likely to change, perhaps through the circumstances of their lives, or the addition of a brother or sister or the arrival or departure of another member of your family. It is even possible that your family moves house during this period. If you were born during the night, then you are likely to experience the influence of the Moon twice in your life. Firstly as a young child, and then again in your mid 70s.

If you were born during the day, then you live through this period in your mid 30s. As an adult in your 30s these changes could involve renovating your home, or moving to a different

house. Your family structure may also change with the addition of a child. Whatever your personal circumstances you fare best when you shoulder your responsibilities, establish healthy habits and honour your feelings.

### **Planetary Period: The Moon subperiod Jupiter**

*From 26 Dec 1963 to 9 Apr 1965*

*Age 33.6yrs to 34.9yrs*

If life has felt a little onerous in the last few years then you are likely to welcome this period, which combines the positive planet Jupiter with the changeable Moon. It is time for you to spread your wings and fly a little.

If you were born during the night, then you are likely to experience the influence of the Moon twice in your life. Firstly as a young child, and then again in your mid 70s. As a child you are likely to enjoy a period of happiness in your home and family. A younger sibling may be born, bringing joy to your family. Alternatively you may bask in the attention of your parents or grandparents. As an adult you are also likely to enjoy peace and harmony in your personal life. It is a good time to enjoy pleasurable hobbies and pastimes and the company of loved ones.

If you were born during the day, then you are in your 30s during this phase. If you are a late developer then you could literally leave your family home, like a young bird flying from the nest. On the other hand you may decide to expand your own family, bringing a child into the world. You may decide to move to distant shores, either permanently migrating to another country or perhaps enjoying a shorter-term trip. You may also find joy in studying a subject that is close to your heart, either academic or spiritual, anything that broadens your mind and brings you comfort.

Either way this period indicates a happy, joyful conclusion to the past few years that have been more difficult. So, without being too grandiose, make the most of the opportunities that come your way.

### **Planetary Period: The Moon subperiod Mars**

*From 9 Apr 1965 to 22 Jul 1966*

*Age 34.9yrs to 36.1yrs*

This is a dynamic time. On the positive side you are undergoing changes in your personal life that are exciting and opening up new possibilities.

If you are living through this period in your mid 30s then you are likely to be restless, eager to move forward with your life goals. Perhaps you have moved into a new home, or neighbourhood and are enjoying exploring your new environment. You may also be renovating or redecorating your home, discovering the joy and stress of the changes. On the other hand events, or another person, may be unsettling right now. You are unsure, tentatively wondering if you are on the right track. It is time to reassess your emotional needs, your life direction and assert your needs. Aggression and other inappropriate emotional reactions get you nowhere right now. Rash decisions are likely to lead to trouble. You would do better to count to ten before responding to anything that stirs your emotions. However, you also are well advised to face the problems at hand, deal with them one by one and instigate the changes that put your life back on track. Once you have done this then you can spend the next five or so years working productively, rather than feeling angry because someone or something seems to be hindering your success. This can be a highly fruitful

period if you are honest and focus on your long-term goals, rather than your short-term discomfort.

If you are going through this period in your late 70s then you need to be wary of becoming a grumpy old man or woman. This is your opportunity to assert your needs, without being aggressive. You can take up an active hobby that gives you an outlet for any frustrations that you may be feeling as a result of growing old. On the other hand if your health is not optimal then you need to alleviate your discomfort, change what you can and let go of the need to control what you can't change. It is time to adjust your expectations while also asserting your needs. If you were born during the night, then you are also likely to experience the influence of the Moon as a young child and the changes in your home life are likely to be influenced by your parents, or a male relative.

The adjustments made during this period are likely to affect the next five or so years of your life, so make sure that you are on the right track. As a result you can really bear fruit in the next few years.

### **Planetary Period: The Moon subperiod The Sun**

*From 22 Jul 1966 to 4 Nov 1967*

*Age 36.1yrs to 37.4yrs*

It is time to seek a better balance in your life. You have been through a few emotional challenges in the past few years. Now you are ready to shine. Hopefully you have overcome the obstacles, come to terms with past mistakes and are ready to move forward. Some schools of thought would say that this is a time when yin and yang are balanced in all areas of your life. As a result you feel as though you can accomplish many of your life goals. You can express yourself freely and honestly, finding a balance between being assertive and accommodating.

Ancient astrologers say that this period heralds a time of spiritual renewal, when you feel that you want to contribute to the world because of your own beliefs. They also say that you will have "dominion over men".

If you were born during the day then you are likely to fare better during this phase than if you were born during the night. This is a time of harmony, when you can enjoy your mid 30s and find peace and harmony. Your work and home life are harmonious. You may change jobs, or move house in order to seek greater satisfaction. You enjoy the changes.

If your chart is considered "nocturnal", then you are likely to experience the influence of the Moon twice in your life, firstly as a young child, and then again in your early 80s.

If you are going through this period in your early 80s then you may have some difficulty finding the right balance in your life. You need to take care of your health, and ensure that you are receiving the correct care from loved ones and professionals.

As a child, it is important your parents take extra care of your health by making sure that you overcome any bad habits and by taking proper rest. On a more positive note you are likely to benefit from changes in your life. These changes could include the birth of a younger sibling or perhaps starting school. Either way you are likely to enjoy the transition, make your parents proud and receive recognition and support for your efforts.

### **Planetary Period: The Moon subperiod Venus**

*From 4 Nov 1967 to 15 Feb 1969*

*Age 37.4yrs to 38.7yrs*

Recently you have been spending your time pursuing your personal goals and finding emotional satisfaction in your achievements. You may have also come to terms with past hurts, before moving forward with your own goals. Now it is time to review your personal relationships.

If you are in your mid to late 30s then you are likely to reassess your friendships, associates and loved ones in the light of emotional satisfaction. You are seeking more supportive and joyous relationships, particularly in your most intimate connections. Any positive and loving bond is likely to flourish during this period. On the other hand if someone is no longer a positive influence then you are likely to gently and lovingly sever ties, and move on with your life. You are now able to concentrate on areas of your life that give you pleasure, joy and many emotional rewards. You may also put some time and energy in re-organising your finances. If you have been saving for a special outing, item or change then you are likely to reap the rewards now. This is a popular and enjoyable phase of your life. Make the most of your opportunities by concentrating on the positive and ensuring that you attract abundance. Take time out for the simple pleasures in life. Make time to walk on the beach, feel the sand and water under your toes and search for seashells. Visit an art gallery with a friend or loved one and enjoy a cup of coffee. Do whatever gives you pleasure and include those you love.

If your birth chart is "nocturnal" then you go through this period in your childhood, or early 80s. Either way you are likely to benefit from any associations with women. Your health is likely to be good and you experience pleasure in comfortable surroundings.

### **Planetary Period: The Moon subperiod Mercury**

*From 15 Feb 1969 to 31 May 1970*

*Age 38.7yrs to 40.0yrs*

This is a changeable period during which you experience many highs and lows. You are reaching the end of one phase of your life and need to discard anything outdated in order to consolidate in the next period. This can include anything from outdated goods, to old bad habits.

If you are living through this period in your late 30s then you are now likely to be reassessing your personal life, knowing that you are soon turning 40. You are required to take a steadier course than you have in the last few years of your life. However this is quite difficult to do because you are feeling far from steady. Life has been expanding and now you have many options. You are tempted to take them all. Part of you just can't say "no". Discipline is not easy now. Your emotions and thoughts are in a state of disarray. Others may give you sound advice, but you are reluctant to take it. As a result you may take be juggling too many tasks in your life. If you do not take control of your own destiny then something or someone else may force you to slow down. For instance, if you over exert yourself then your health may fail. Alternatively if you try to push business contracts, then legal matters may put a dampener on your projects. You can make the most of this erratic period by making a list of your priorities and paring down your activities. Make time for healthy pursuits. Try to sort out all contracts and legal matters in a detached and non-emotive manner. If you can put your emotions to one side then you are more likely to settle on a new balanced course of action. If something is really restricting your life then perhaps you need to walk away? However, make sure that you are making a balanced decision. If you can focus on the most important aspects of your life,

rather than become distracted, then you are more likely to sail smoothly into the next phase.

If your birth chart is "nocturnal" then you go through this period in your childhood, or early 80s. Either way you are likely to experience a few highs and lows.

### **Planetary Period: Saturn**

*From 31 May 1970 to 26 Dec 1971*

*Age 40.0yrs to 41.6yrs*

Life is about to slow down take on a more serious note. It is time for you to consolidate as many areas of your life as possible. You need to slow down, take stock and re-build where necessary.

If your chart is "diurnal" then this period coincides with your 40th birthday. You are taking stock of the first 40 years of your life, going through a mid-life transition. As a result of your stocktake you may decide to make changes. If you have been living true to your own heart and mind then you are likely to make some minor adjustments in certain areas of your life, moving forward with realistic goals. Perhaps it is time for you to challenge some your own bad habits, stale beliefs, out-worn values or re-evaluate associates. This may be a little daunting, but once you have undertaken the process of evaluation, elimination and integration then you are likely to be in one of the most productive periods of your life. It is hard work, but it is worth it if you can overcome your fears and self-doubt and forge ahead, step by step! You need to have good health to make the most of the changes that occur during this period. Therefore you would also benefit from undertaking a health check-up, ensuring that your diet is adequate and taking part in good exercise programs. However, if you feel that you have somehow wandered off track then you may experience a strong sense of dissatisfaction. It is time to realize your destiny. The area of your life that undergoes changes right now is likely to be influenced by the nature of the planet Saturn in your birth chart. Therefore you could consult an astrologer for more specific details. Home, career, friendships, marriages, goals, health, personal happiness, parents, siblings and other such matters could easily be under the microscope during this phase. This is an important time and therefore seeking the wise counsel of others is favourable.

If you experience the influence of the planet Saturn early in your life at age 9 years then you are less likely to be in control of the changes that are occurring right now. Your parents' influence, in particular your father's, is paramount.

### **Planetary Period: Saturn subperiod Jupiter**

*From 26 Dec 1971 to 22 Jul 1973*

*Age 41.6yrs to 43.1yrs*

After reflecting on your life and making some adjustments you may now see some light at the end of the tunnel. On the positive side you are now ready to expand your horizons, slowly and surely working towards your goals. You may adjust your expectations somewhat during this period, becoming more realistic in your life goals. This is particularly true if you experience the influence of these planets in your early 40s. You need to also take extra care of your health with a good diet and exercise regime. Moderation is an important lesson right now. You would do well to moderate and adjust your expectations, rather than putting pressure on yourself or other people. Otherwise you could become involved in a legal battle. This is an important time and therefore seeking the wise counsel of others is favourable. In fact you may receive rewards from your parents, peers, employers, or people in high places.

If your chart is "nocturnal" then you are likely to experience the influence of these planets around the age of 10 and therefore you are more likely to be influenced by changes in your parents' lives. Ideally your parents are providing you with a little more responsibility and freedom as you mature.

### **Planetary Period: Saturn subperiod Mars**

*From 22 Jul 1973 to 16 Feb 1975*

*Age 43.1yrs to 44.7yrs*

This is a challenging time in your life. On a positive note your drive and ambition are likely to increase and you have the ability to work satisfactorily towards achieving your objectives. However, the planets Saturn and Mars can be quite volatile when combined and hence you are likely to be restless, impatient and perhaps even angry during this phase of your life.

If you are in your 40s then you are likely to want changes, but perhaps are frustrated by others' lack of support. A particular project may be challenging right now, or it could be a specific area of your life. The test is to express your drive and energy through a constructive rather than destructive project or activity. Hard work and self discipline pay off. If you do have to confront a tricky situation then timing is everything. Make sure that you choose your time carefully. If you do feel somewhat discouraged remember that positive results sometimes require sacrifice. As famous author Oscar Wilde once said, "*what seems to us bitter trials are often blessings in disguise*".

If you are living through this at the age of 12 then you may also feel somewhat constricted. Perhaps you believe that one of both of your parents is too strict, or perhaps you feel somewhat overwhelmed by schoolwork. Either way patience is the key.

Whether you are 12 or in your early 40s it is a good time to start a program of physical exercise. You are likely to benefit from any sport or physical activity that helps you to discipline your excess aggression. This is also a good time to question your true purpose in life. It is time to focus on your destiny, what you can achieve through contributing to humanity rather than your own personal desires. Spiritual disciplines may help guide you through this phase so that you feel truly blessed to be fulfilling your purpose.

### **Planetary Period: Saturn subperiod The Sun**

*From 16 Feb 1975 to 12 Sep 1976*

*Age 44.7yrs to 46.3yrs*

After a relatively tough period you can now start to see some light at the end of the tunnel.

If you are in your 40s then during this period you start to feel stronger, more like your old self. In fact you may feel stronger than you ever have before. All areas of your life start to improve. You can see the rewards of your previous hard work. Projects mature. You also seem to be maturing in your attitude to different areas of your life. As a result those nearest to you are likely to notice and respect your new levels of maturity. You need to continue to take good care of your health. It is a good time to have a general check-up with your doctor, make sure that your efforts from the last few years have paid off. You are likely to feel more energetic than you have in some time, if you have been adhering to a good health regime. If not, then you still have time to implement healthy changes.

If you are a teenager then you may experience a little more freedom. Gradually your parents entrust you with more responsibility, and also with more independence. If you have worked

hard at your schoolwork in previous years then you are likely to achieve good results now. You shine in any area that requires hard work, application and discipline.

Either way you are now able to reap the fruits of your hard work, and to take a moment to appreciate the results.

**Planetary Period: Saturn subperiod Venus**

*From 12 Sep 1976 to 9 Apr 1978*

*Age 46.3yrs to 47.9yrs*

Whether you are a teenager or in your mid 40s, the focus is currently on your relationships and finances.

Firstly how comfortable you feel with the people in your life? Your relationships with friends, relatives and your primary partner need to be consolidated. You need to ensure that the friends, family members, and romantic partners are supportive. Right now you need your primary relationships to reinforce all that is positive in your life. If someone is a negative influence then you are likely to take steps to end the union. In turn you should not neglect your loved ones.

If your birth chart is considered to be "nocturnal" then you go through this period when you are in your mid-teen years. As such your circle of friends may change. It is also possible that you form a deep and lasting bond with someone. This may be a friendship or it may be a bond that leads to marriage in the future, even though you are rather young for such a serious consideration. It is also possible that you move away from home. Therefore all of your associations change. However, you should only consider this if your elders support your move. For instance it may be necessary for you to move from an isolated rural home to a city in order to further your studies, or opportunities for work. This is a move that your parents, or caretakers, are likely to support. On the other hand leaving home to pursue a romance is unlikely to be a positive move right now. You may focus on your money during this period, perhaps taking up a paid job that helps you save money and feel a little more independent. You may even decide to leave school for paid work. Once again any responsible decision is a healthy one; anything rash is ill-advised.

If your birth chart is considered "diurnal" then you are likely to experience this in your mid 40s. Therefore you are likely to be reassessing your associations in the light of whether or not you wish to maintain a connection in the latter half of your life. Serious consideration needs to be given to past mistakes and current needs. You are also likely to reconnect with people from your past. This can be a pleasant or unpleasant experience, depending on the nature of the relationship. For instance if you are single then you may meet old friend and marry. If you are single then you are likely to seriously consider your marital status. You will either decide to remain single and settle down happily on your own, or you may seriously search for a partner. It is also possible that you decide to end a serious personal or business partnership. If this is the case then you need to be very careful of legal ramifications. Legal matters need to be dealt with now. It is also time to get serious about your finances. Your financial security and independence can be attained now by careful planning and action. As a result you may begin or change your financial investments or make a commitment to a joint project.

**Planetary Period: Saturn subperiod Mercury**

*From 9 Apr 1978 to 4 Nov 1979*

*Age 47.9yrs to 49.4yrs*

You have some serious decisions to make right now. In the past few years you have been focusing on personal satisfaction within your relationships.

If you are in your late 40s then you have been reassessing whether or not your primary relationships support you and your values. Now it is time to make some decisions. You have been focusing on consolidating your relationships and finances and now you need to make some choices about your future. This could involve legalities, the signing of contracts connected with your work or home. Perhaps you are reassessing your financial investments or your career options. If you run a small or large enterprise, you may find that business slows down during this phase. Ancient astrologers say that your fortune will increase, but that you will lose some of it. It is time for consolidation and planning for the future. You may need to restructure your organization. On the home front you may have difficulty communicating your most private thoughts to your loved ones. Your opinions are changing, but you may find it difficult to adapt and those around you may express disapproval. You are likely to enjoy spending time with children, rather than adults, because children are so accepting. Alternatively you may pursue childhood associations, drawing comfort from old friends. You may also enjoy a program of study or re-training. Slowly and surely you make the changes that are necessary. Your marriage commitment either deepens or you leave, you renovate or leave your home, your children grow up and leave home. Whatever the scenario once the decisions are made you gain a real sense of achievement that can be celebrated.

If your birth chart is "nocturnal" then you live through the influence of these planets in your mid to late teens. As such you are likely to be required to make decisions that change the course of your life. You are well advised to concentrate on your studies if these are requirements for future employment, to seriously consider any apprenticeships that offer you a solid future, or to consider your work options. Explore all of your options so that you can make a wise and considered choice. Ask your peers and elders for advice. The more that you apply yourself with discipline and hard work right now, the more that you will reap the benefits in a few year's time.

### **Planetary Period: Saturn subperiod The Moon**

*From 4 Nov 1979 to 31 May 1981*

*Age 49.4yrs to 51.0yrs*

One step at a time could be the motto for this phase of your life. In some ways it may feel like the end of an era. In fact one period of your life is coming to a close ready for a bright new chapter. In the meantime you are required to carefully consider your long-term goals while paying attention to the details of your daily life. This is not the right moment for chasing rainbows or seeking instant gratification. It is quite the opposite. You may be forced to put your own needs to one side while you take care of a loved one. Your home may also need attention. Redecorating may have to wait until repairs are taken care of. If you are involved in a business enterprise, either your own or someone else's, then you are required to concentrate on your work at the moment. This is a time to focus on building your business, applying yourself to your work, rather than escaping for a long holiday.

Whether you are in your late teens or late 40s, this is time to focus on lasting fulfillment rather than instant gratification. Ask yourself what steps you need to take now in order to achieve your lifelong goals. As such, it is a good time for putting your house in order. You may need to make major repairs to the foundations of your house or perhaps you plan to move to another place, perhaps even another country. Choose your new home wisely because you may settle here for quite some time. Even if you do plan to move again this home is a

good investment and therefore should be chosen carefully. A long journey could take place during this phase. If you have been struggling with a long-term relationship now is the time to decide whether or not to work on the friendship or say goodbye, if you haven't beforehand. If this phase occurs earlier in your life at the age of 18 then you may be required to change schools, concentrate on your studies or move house because of your parent's or your own ambitions. If you are older, around the age of 49, then it may be a good time to start planning for your retirement. You may have extra responsibilities such as the care for an older relative. Your personal needs are important and yet, you may be required to take responsibility for someone else's needs rather than your own during this phase. If you face your responsibilities during this period then you are likely to reap great rewards in the next phase of your life.

### **Planetary Period: Jupiter**

*From 31 May 1981 to 16 Feb 1983*

*Age 51.0yrs to 52.7yrs*

The previous year or so has been a difficult period, one during which you may have felt weighed down with responsibilities. You may have enjoyed the hard work and experience a real sense of achievement.

If your birth chart is "diurnal" then you are entering this new positive period at the age of 51. For the past 11 years you have been working toward your life-long goals. In some ways you were in a holding pattern, fulfilling obligations and preparing for this new phase. The good news is that now you are ready to spread your wings. You have moved into a new phase and are now able to open the door on a new chapter of your life. If you have faced your fears, embraced your responsibilities and acted with integrity then you can leave your troubles behind and enter into a new phase of happiness. You now reap the rewards of previous years' hard work. Of course, if you have avoided shouldering your responsibilities then you may have a feeling of having squandered your opportunities. Nevertheless the Gods are smiling on you right now. You are held in high esteem and are likely to enjoy promotions and salary increases in your work. You may also receive recognition for your public works. It is a good time to cultivate associations with people in high places because they are likely to bestow gifts and honours. You may leave home, travel to a foreign land, start a new course of study, marry, have children or fulfil any of your personal goals. Make the most of this joyous new phase of your life by embracing the new opportunities. When a door opens, follow your path and have fun.

Much the same can be said if you have a "nocturnal" birth chart. You start this new period at the age of 20. You, too, are reaping the rewards of the past year's work. You, too, have the chance to spread your wings and fly. You are now launching into a whole new phase of your life. You may leave home, travel to a foreign land, start a new course of study, marry, have children or fulfil any of your personal goals. This is your personal quest to do noble deeds both for yourself and others.

### **Planetary Period: Jupiter subperiod Mars**

*From 16 Feb 1983 to 3 Nov 1984*

*Age 52.7yrs to 54.4yrs*

It is time for another change of direction. Despite the fact that you feel like you have boundless energy, you need to slow down a bit and reassess your options. In recent times you have made many inroads towards achieving your personal goals and have received a boost to your self-esteem, not to mention your position in society and your finances. However, now it is time to reassess your direction. After a period of self-confidence you may experience

some moments of fear and anxiety, wondering if you have taken on too much in the previous year or so. It is time to make some changes.

Specifically you may journey to another land in order to seek your new direction, or you may seek the counsel of others. Ancient astrologers predicted difficult relations with women during this period. Therefore you may benefit from relying less on other people and more on your own resources. This planetary period can occur in middle age or in your early 20s. The ancient astrologers also predict that 21-year-old women could expect the possible birth of child during this period.

### **Planetary Period: Jupiter subperiod The Sun**

*From 3 Nov 1984 to 22 Jul 1986*

*Age 54.4yrs to 56.1yrs*

This is a time of blessings. Your optimism and enthusiasm are on the rise, as you are ready to embrace new opportunities. You are popular and receive recognition for your personal traits, as well as your achievements. Others enjoy, and respond, to your radiance right now. After a period of change, you are now confident, ready to take on the world. This is the only caution underlying the combination of these planets - beware grandiosity. You must take care not to over-indulge or over-state your case in certain areas of your life. This is not the time for self-righteousness or moralizing. You can teach, but not preach. A little self-discipline is required to make the most of this period. As a result you may have the chance to study, travel, teach, or publish great works. As former Israeli Prime Minister Golda Meir said: *"Trust yourself. Create the kind of self that you will be happy to live with all your life. Make the most of yourself by fanning the tiny, inner sparks of possibility into flames of achievement."*

If you experience this period during your mid 50s then you are likely to seek more freedom. After years of paying service to others, either through work or family, or both, you are now ready to shine in your own right. You may study, travel, teach, marry, paint, draw, write, act or pursue any life enhancing pastime. The emphasis is on pursuing your life-long dream. Hopefully, in previous years, you have gathered the resources that support you in your happy choices right now. However, don't fret, the Gods are smiling on you and you will find a way to "have your cake and eat it too". You are likely to enjoy the added benefit of hindsight. You are wise, ready to explore new territories but with the knowledge that is gained through experience.

If you are living through this favourable period in your 20s then you are keen to pursue your lifelong goals. You have the optimism of youth on your side, and others are likely to bestow gifts, financial or otherwise, to help you pursue your dreams. You, too, may study, travel, teach, marry, paint, draw, write, act or pursue any life enhancing pastime. However, you may also be keen to make these activities your profession rather than a hobby or pastime. You are likely to be fresh, confident in your ability to move forward in your life. Everything seems new and glossy and you enjoy the challenge of exploring unknown territory.

### **Planetary Period: Jupiter subperiod Venus**

*From 22 Jul 1986 to 8 Apr 1988*

*Age 56.1yrs to 57.9yrs*

The planet Jupiter is known to expand whatever it touches, and in this case, it's combining with the planet Venus to emphasise relationships, pleasure, beauty, the arts, romance, and money. During this phase your appetite for pleasure is increased, whether experienced

through romance, the arts or spending money. You may enjoy a pleasure cruise, a holiday with a loved one, relaxing with friends and family or spending money on a much-sought after object. Love is in the air. This may be a renewal of vows of love with an existing partner, or you could meet someone new and exciting. Enjoy the romance, but make sure that you are not seeing things through rose-coloured glasses. On the whole, you are likely to thoroughly enjoy this time of your life. The only caution is to ensure that you act with moderation. If you start overdrawing on your bank account then cut up your credit card until you can properly budget.

If your birth chart is "diurnal" then you are in your mid 50s and life has never been better. Your finances are blossoming and you may receive an expected boost to your income. Your love life is also rewarding. It is possible that you have decided that you are happy to live on your own rather than have a lover. Alternatively you may marry, or renew the vows in an existing marriage. Whatever the scenario right now you are happy and fulfilled.

If you are 25 then you are likely to discover love and marry during this period, if you have not done so before. Money may play its part in the type of wedding that you can afford, but nevertheless you are eager to tie the knot. The only caution is not to rush into a life-long commitment until you are sure. You are in a favourable period and therefore can make a favourable choice, or simply enjoy the romance and focus on earning a living.

### **Planetary Period: Jupiter subperiod Mercury**

*From 8 Apr 1988 to 25 Dec 1989*

*Age 57.9yrs to 59.6yrs*

It is time to reassess your goals and make some decisions to align yourself more closely with your life plan. If you have been longing for a new path then now is the time to make the decisions and implement changes. You may be able to make these changes quickly, or you may be forced to slowly change. This will depend on other aspects of your birth chart. However, this is a positive period and you are able to enlist the help of other people to ensure that you move forward in your life. Promotions, rewards and other forms of recognition are likely to come your way. You may decide to embark on a journey to foreign lands, or perhaps you prefer to wander the halls of academia. Either way you are keen to expand your mind. You are not likely to be as concerned with life's details, finding these things quite tedious. The more that you have felt weighed down with responsibilities during your lifetime the more that you are likely to feel the need to escape during this period. You may seek inspiration in religious or spiritual pursuits. Listen to uplifting music, start meditation classes or attend a theatrical event. Now is the time to find ways to improve your lifestyle. Follow your heart's desires without jeopardizing your success so far. This is an excellent period for growth and expansion in all areas of your life. As American actor Alan Alda once said: *"Laugh at yourself, but don't ever aim your doubt at yourself. Be bold. When you embark for strange places, don't leave any of yourself safely on shore. Have the nerve to go into unexplored territory."*

If you live through this period in your mid to late 20s then you are likely to feel happy and optimistic right now. You may have discovered love and married in the last few years. Now you are happy to focus on your work, making money and building up your resources in order to start a family. It is also possible that you marry during this period. You are a person of good standing in the community, enjoying the company of your friends, although your friendships may change over the next few years. You are still feeling youthful and ready to take on the world.

If you are in your late 50s then you are happily making choices that further enhance your life. If you married in a previous period then you are busily making plans with your spouse. You may marry during this period. If you are footloose and fancy free then you may choose to focus on your personal interests or a favourable work project. Whatever the scenario this is a happy time.

### **Planetary Period: Jupiter subperiod The Moon**

*From 25 Dec 1989 to 12 Sep 1991*

*Age 59.6yrs to 61.3yrs*

Laughter abounds during this phase of your life. No matter what happens you are able to count your blessings and see the funny side. You are also feeling generous and able to give to other people right now. In particular you may enjoy working with women, or children. Your benevolent nature is likely to inspire others, and reap rewards for you, too. You are not necessarily seeking recognition, but you are likely to receive it. As the philosopher Seneca once said, "*he that does good to another, does good also to himself, not only in the consequences, but in the act; for the consciousness of well-doing is, in itself, ample reward.*" This is a joyous and expansive period of your life which you can easily share with your loved ones. Make the most of the opportunities that arise, particularly those that occur in your personal and home life.

If you are living through this period in your late 50s then you may be making changes in your home life. Your family may be expanding with the addition of grand-children or other young members of the family. You are looking at the comforts in your life, hoping to increase your sense of well being. Your focus is changing from financial security and accumulation of wealth to that of comfort and lifestyle. If you work hard now then it is because you want to improve the quality of your life, to increase your choices in a few years' time.

If you are going through this period in your late 20s then you are experiencing a slightly different influence of these two planets. In the most positive way you are being asked to discard childish things and move into adulthood. It is time to really be honest with yourself about your own personal goals. What do you want to achieve in your own life? The time for pleasing your parents, or anyone else, has come to an end. Now you have the chance to really embrace your own personal dreams. Doors will open. You just have to have the courage to walk through.

### **Planetary Period: Jupiter subperiod Saturn**

*From 12 Sep 1991 to 31 May 1993*

*Age 61.3yrs to 63.0yrs*

Now is the time to consolidate on the achievements past ten years of your life. If you have been saving money for a big project then now is the right time for your investment.

If you are in your early 30s then you may invest in a new house, renovate an existing home or move to a completely new land that offers new opportunities. This is time to consider all of your options and make decisions that are in the best interests of yourself and those nearest and dearest. You need to embrace new opportunities while also establishing a good foundation because otherwise you will soon feel restless, in need of change. It is also a good time to reassess your life. You are a turning point. Perhaps you need to change some of your social contacts. Friendships may have become stale, not really supporting your goals in life. As a result these friendships may end. At the very least your friends need to make

adjustments. This is not a good time to lend money to friends. You may receive wise counsel from a wise elder; in particular your relationship with a grandfather figure is highlighted. This bond is changing, as are others.

If you are in your early 60s then it is also a good time to reassess your life. You are a turning point. Make the most of your assets, reassess your goals and stay tuned to your sense of purpose. It may be time to consider retirement, to start planning. You may be ready for a new phase of your life, but make sure that you have plans because the next period demands that you are active, not inactive.

Whatever your age you are well advised to make the most of your assets, reassess your goals and stay tuned to your sense of purpose. Don't let fear rule your life. Work on your self-confidence without being too grandiose. You are correct in that towards the end of this period your life is likely to change so it is up to you to make sure that you are fulfilling your destiny.

### **Planetary Period: Mars**

*From 31 May 1993 to 31 May 1994*

*Age 63.0yrs to 64.0yrs*

You have just left the favourable rays of the planet Jupiter and entered into the planetary influence of the planet Mars. This feisty planet rules Mars rules individuality, independence, passion, courage, sports, vigour, aggression, survival and also sexuality. Therefore for the next seven years these traits will be more prominent in your life. It is time for a change of direction. The past decade has been a time of expanding your horizons through study, travel, teaching or other avenues that promote your well being. Now you need to consolidate on the past and actively pursue your ambitions. If you are not careful then this could spark conflict if you push too hard or if others are not accustomed to you being assertive. You have a right to state your desires. As long as you act with integrity and are not too aggressive then your friend, colleagues and loved ones are likely to co-operate. Nevertheless beware the damage that can be wrought by those who are threatened by your newfound independence or who judge you lacking in uprightness.

If you are 32 then you are likely to enjoy hard work with an abundance of energy to apply to chosen tasks. Make sure that you don't overdo it. Otherwise you are likely to burn out. Tiredness or ill health are signals that you need to take time out for rest and recreation. A long journey may be beneficial, but not to dangerous parts of the world.

If you are 63 then you may be experiencing a new burst of energy as you retire from the work force and discover new ventures.

### **Planetary Period: Mars subperiod The Sun**

*From 31 May 1994 to 31 May 1995*

*Age 64.0yrs to 65.0yrs*

The time has come for you to reassess your goals.

If you are 33 then you may feel driven to achieve your personal goals or to shine in one area of your life. However, you need to proceed cautiously. Right now you have excess energy. It is important to focus on important matters without going overboard. If you do not consider other people then you may experience some difficulties during this period because you are alienating rather than inspiring those around you. If you try to push your way of doing things

onto others, then those closest to you may withdraw their support. Try to consider other people and direct your energy into projects and plans that have a higher purpose than simply your personal ambitions. Then you will truly shine.

If you are 64 then you are also well advised to try to enlist the co-operation of others in order to fulfil your needs. You may value independence and freedom right now, but you won't always be so keen to enjoy your own company.

**Planetary Period: Mars subperiod Venus**

*From 31 May 1995 to 30 May 1996*

*Age 65.0yrs to 66.0yrs*

It is time to discover your passion. On a daily basis this means that you are likely to seek simple pleasures such as listening to inspiring music, visiting art galleries or having fun with friends. On a more significant note, you can also now focus on deeper motivating forces. You may discover a talent, project or pastime that consumes you. This may have long reaching affects, changing your path in life as you reassess your options.

If you are 34 then you need to be wary of your sexual appetites. If you are happily married and enjoying an active sex life then your passions are inflamed and you are happy. However, if you are experiencing some frustration then you are very vulnerable to a sexual affair right now. If you are single then you may fall ardently in love during this period. If so, you need to ensure that your lover can fulfill more than your sexual needs. Right now excitement takes precedence, but this will pass. At the end of this phase you will need to make decisions so try to retain your emotional equilibrium. You are also well advised to see if you cannot ignite passion in another area of your life. Working hard to improve your income can be fruitful as long as you do not alienate others in the process. However, you may discover a passion for a cause or hobby that takes your life in a positive direction.

At 65 it is time for you to enjoy yourself. Your sexual appetite may suddenly increase surprising you and your partner or, if you are single, then you may pursue a romance. You are keen to share pleasure and games with other people, and yet also to take stock of your finances.

**Planetary Period: Mars subperiod Mercury**

*From 30 May 1996 to 30 May 1997*

*Age 66.0yrs to 67.0yrs*

It is time to make some decisions regarding your life goals. What motivates you? Where do you want to be in a few years time? It is time to move forward, one step at a time. If you have difficulty concentrating on tasks at hand then employ someone to help you make decisions, because it is vital that you steadfastly, and not rashly, grow and progress. Any decisions made now are likely to involve or affect any prominent men in your life, as well as your own levels of energy. If you have been tired and despondent then perhaps you have lost the ability to take control of your own life. It is time to make some decisions, and then to take action. You need to assert your desires in order to make changes, without running roughshod over anyone else. Any area of your life that has settled into a pattern may be disrupted because you are changing your mind and moving forward. There may be some indecision, but once you make up your own mind then you are able to confidently assert your own thoughts and opinions. Make sure that you are not too impatient or too much of a hot head.

If you are 35 then you need to reassess your life goals in the light of your responsibilities to

others. You may have a family to consider and therefore your decisions impact on those who depend on you. If you are too forceful then you are likely to alienate loved ones. On the other hand you are also seeing the past in a different light, and perhaps not a kind one. You may be impatient with your choices, and the choices of those closest to you. You need to exercise as much tolerance as possible and realize that these feelings are fleeting. You need to make changes, but there is plenty of time. Others may initially feel intimidated by your need to break free of limitations, but those who truly value you soon adjust.

At 66 you are being forced to make some adjustments in your life, to change your mind and to take a different road. This may be as serious as having to make some big lifestyle changes, or as simple as having to take up a project that demands your attention. Boredom is a signal that you need a new interest. Excessive worry about loved ones is also a sign that you need to find something that ignites your passion.

### **Planetary Period: Mars subperiod The Moon**

*From 30 May 1997 to 31 May 1998*

*Age 67.0yrs to 68.0yrs*

This could be an emotional time in your life. Strong feelings are likely to surface. These could be past hurts and resentments bubbling to the surface to be cleansed and discarded once and for all. Perhaps you are grieving a loss. Whatever the feelings it is important that you do not deny their existence. You currently have the ability to face these feelings and integrate them in order to move forward with your life. It is time for you to reassess your goals and take action to actively pursue interests and desires. If you have been putting other people's needs before your own then you may upset one or two loved ones (in particular any woman close to your heart). Nevertheless you do need to assert yourself and experience some more positive emotions such as excitement and joy. Patience and understanding may be in short supply right now, but these are the qualities that you need to apply to all of your relationships while moving forward with your own life. If you are feeling despondent then ask yourself the following questions, What would it take to spark my interest and, If I had no responsibilities what would I really enjoy doing right now? Whatever your age, take time out to pursue hobbies and pleasurable pastimes and the answers will soon come. Start with little things like a walk on the beach, reading a good book, flying a kite then move on to more social events such as joining a sports club or gym or enrolling in a special interest course. Then you will be ready to tackle the bigger changes that may be required in your life. Of course, the path may not be smooth but the satisfaction will be great if you face the truth that your feelings are uncovering.

### **Planetary Period: Mars subperiod Saturn**

*From 31 May 1998 to 31 May 1999*

*Age 68.0yrs to 69.0yrs*

Your role in life is changing. It is time to take things a little more seriously so that you can build on past successes, consolidate present plans and move forward in a realistic manner.

At 67 this may mean shouldering more responsibilities for family members - either children or aging parents. Alternatively you may feel the need to start planning for retirement. Until now you have been happy to work for your income and support your loved one's present needs, but now you see the need to plan for the future. In a man's chart this indicates a time during which you need to focus on your marriage, otherwise you can have strife from your wife. Parents need to take extra care of their sons, according to ancient astrologers. This is a time during which to keep a close watch over your children, if you have them. Right now you

are building for the future by focusing on positive pursuits, rather than overly emphasizing your own personal ambitions, no matter how tempting.

At 68 you may be faced with tough decisions regarding the support systems in your life. If you are healthy and happy then you may need only to renovate your home, making it more comfortable for the rest of your life. However, it is also possible that your thoughts turn to finances, death, growing old, retirement villages and other such matters. This is not necessarily a negative situation. In fact you could find it satisfying to make such decisions, knowing that you are acting responsibly.

### **Planetary Period: Mars subperiod Jupiter**

*From 31 May 1999 to 30 May 2000*

*Age 69.0yrs to 70.0yrs*

Having faced a few fears and sorted out your responsibilities in the last year, now it is a time to move forward with your goals, to reap some of the benefits of a job well done. Rash decisions are never wise, but you are ready to take some well-considered risks that help you grow.

At 38 a change of profession, job or a new course of study is beneficial during this period. You may travel for pleasure, revisit the past or move to a foreign country. If your responsibilities prevent you from taking off to distant shores then new hobbies or courses of study could be the answer. Studies taken during this period could change the course of your life. You need to listen to the parts of you that require adventure. Otherwise you could become very restless and perhaps even resentful of those who you feel are dragging you down. Assess your goals in the light of your responsibilities and take appropriate action to expand your horizons.

At 69 you may also benefit from any hobby or pastime that stimulates your mind, expanding your world view and helping you to see things from a different perspective. Travel may also broaden your horizons.

Whatever age, you are reaching the end of one cycle ready for a new and favourable one.

### **Planetary Period: The North Node**

*From 30 May 2000 to 31 May 2003*

*Age 70.0yrs to 73.0yrs*

Ancient astrologers claim that this is a most fortunate time during which you will associate with noble and high-minded people. They say that you will carry out good deeds and receive rewards for your efforts. This could be satisfaction for a job well done, or perhaps monetary rewards. Promotions, new opportunity, beneficial contacts and friends could all pour into your life during this time. Inheritances and legal affairs are also likely to bring financial rewards.

This is a time for new people, events, groups and opportunities. Therefore, you need to make sure that you are not blocking the benefits that you are destined to enjoy. Take up meditation, attend self-improvement courses and read uplifting books to ensure that you are focused on positive aspects of your life. Focus on abundance and all of the physical, emotional, intellectual and spiritual rewards that you would like to attract into your life right now. The spiritual Law of Attraction is working overtime. Later you may have to make some choices about what to keep and what to discard, but right now is about trying new things,

having some fun, and reaping the rewards that you richly deserve.

### **Planetary Period: The South Node**

*From 31 May 2003 to 30 May 2005*

*Age 73.0yrs to 75.0yrs*

After a period of embracing new and exciting ventures and meeting new people, it is now time to stop and take measure. A new chapter recently started in your life and now you need to ask whether or not you have created sufficient time and space. Are there still some things that you need to discard from your old way of life? Have your loved ones truly accepted the changes? The answers to these questions may be a little confronting. In a world that encourages accumulation and ambition, it is often difficult to let go of worldly pleasures. However, that is exactly what you are being encouraged to do. In a few years time you will be able to truly express this new side of yourself, but right now there is still some fine-tuning needed.

At whatever age this phase occurs, it is time to contemplate your life lessons and let go. This may involve literally stepping out of an on-going battle, moving home, or resigning from a job. On the other hand it could mean that it is time to forgive and forget someone's hurtful actions. This does not mean that you have to become involved with that person again, but rather than you choose to continue your life without resentment or bitterness. To a certain extent events may be a little out of your control right now. Destiny is playing a prominent role. It is part of your life's journey to go with the flow as much as you can during this period. At the end you will feel like a butterfly that has transformed from a pupae. Author Richard Bach sums up this period in the following saying, "*what the caterpillar calls the end of the world, the master calls a butterfly.*"

### **Planetary Period: The Sun**

*From 30 May 2005 to 3 Nov 2006*

*Age 75.0yrs to 76.4yrs*

The quality of this period of life varies depending on whether or not you were born during the night or day. Generally speaking it is a positive phase.

If you were born during the night then you experience the shining influence of the Sun's rays in your mid 40s. You have been reassessing your life goals and making the necessary changes. This can range from something as simple as spring cleaning your house, to a more serious change of career or relationship. After a period of letting go and perhaps experiencing a sense of loss, you are now ready to move forward and shine in your life. Opportunities arise in all areas of life. People from all walks of life are ready to help you achieve your personal and professional ambitions. You have the opportunity to live a rich and rewarding life with appreciation from other people.

If you were born during the day then you experience the positive influence of the Sun's rays from birth, and then again in your mid 70s if you live that long. Depending on other influences in your birth chart, you are likely to have a rewarding childhood. Your parents dote on you in early childhood, helping you to experience a good sense of self. You may experience some hardship in the first few months of life, according to the ancient astrologers, but this quickly passes. You are a joyful and happy child with loving parents. Later in life you can enjoy the company of friends and your children. The ancient astrologers say that you will have good fortune, a full life, and quiet. Of course other astrological influences could indicate contrary influences. Modern astrologers would state that your early life is a period

when your father is a major influence, either positively or negatively depending on the position of the Sun in your birth chart.

### **Planetary Period: The Sun subperiod Venus**

*From 3 Nov 2006 to 8 Apr 2008*

*Age 76.4yrs to 77.9yrs*

If you were born during the night then this phase indicates that you are likely to experience pleasure in all of your activities, but particularly those involving women, the arts, diplomacy and beauty. For this reason you are likely to concentrate on pursuing projects and people who offer you the opportunity to increase your sense of well being. If you are married you enjoy a renewed sense of fun and fulfillment. If you are single you may meet a potential partner and plan a wedding. The ancient astrologers claim that you could make a profitable journey. Therefore you may travel to another place in order to pursue a pleasurable pastime or a significant relationship. You may discover that you are artisan and take up a new hobby that involves the arts, crafts, beauty or fashion. Your finances are also likely to flourish. In general you feel and act in benevolent ways. In turn others are also generous to you.

If you were born during the day then this period occurs early in your life then you are likely to enjoy your first bonds with other people. Relatives and friends are likely to dote on you. You may also welcome a sibling into your family. Hopefully this is a positive time where you learn that life can be fun and pleasurable. However, this could depend on other aspects of your birth chart. Whatever your circumstances it is time for you to learn how to interact with others. These skills will influence you for the rest of your life.

### **Planetary Period: The Sun subperiod Mercury**

*From 8 Apr 2008 to 12 Sep 2009*

*Age 77.9yrs to 79.3yrs*

If you were born during the night, then this is a busy time, and you are well advised to make the most of the opportunities that arise. In other words it is time to get down to business. In the previous year or so you have been having a wonderful time, enjoying the pleasures of life. Now you need to concentrate on matters at hand. You may need to make some decisions in either your private or professional life. Either way you are required to gather information, communicate clearly and sign on the dotted line. Matters such as personal interactions, business plans, contracts and marketing plans need attention. If you do not pay attention to these details you may be faced with lawsuits or other such obstacles. This is an excellent time to launch a new project, sales or marketing plan or business. Networking skills come in handy right now. It can be surprising to note what great projects start over a morning coffee chat. The seeds of ideas can now be put into action. Decisions regarding your home, family and financial matters are also highlighted. The more time you spend ensuring that you are well equipped in all areas of your life, the more that you will feel emotionally satisfied in the next phase.

If you were born during the day then you undergo these planetary influences at a young age. Ideally the adults in your life are able to tune in to your needs and help you grow in a positive and healthy manner. This will depend somewhat on other influences in your birth chart. However, it is time to start communicating. The people around you shape the way that you learn, speak and perhaps read at a young age. It is a good time to start some type of childcare or schooling, as long as the most suitable place for you can be investigated and booked. Friendships formed now can also have a strong affect on your young life. During this period you are learning about the world, and making decisions that can last a lifetime.

**Planetary Period: The Sun subperiod The Moon**

*From 12 Sep 2009 to 16 Feb 2011*

*Age 79.3yrs to 80.7yrs*

If you were born during the night then you experience this influence of the Sun and Moon during your late 40s. It is again time to reassess your personal goals in the light of the last few years. Many doors have opened in the last few years and you have been able to enjoy the privileges of other people's support, both financial and emotional. Now you need to take a little more care with your resources. Do you have the resources to carry you forward into the next phase of your life? Do you need to invest a little time and money in those who have supported you? You may find that your circumstances are changing and that you have to adopt the role of supporter and nurturer for a while. The more that you are able to adapt and balance the needs of loved ones with your own, the more that you are able to reap the rewards from this period. On a slightly different note you may also like to change your diet, exercise regime and have a health check up.

If you were born during the day then you experience the influence of the Sun and the Moon during your early childhood. During this period your life changes, as does your relationship with your mother and father. The most likely cause is that you start your schooling. Generally speaking this is a period during which you discover more of your own independent self. Ideally you discover your own truths, taking guidance from parents, caregivers, siblings and teachers, however it is probable that the adults in your life are largely in control of the changes that are occurring in your life right now. You are sensitive to your surroundings and need caregivers who are able to tune in to your needs.

**Planetary Period: The Sun subperiod Saturn**

*From 16 Feb 2011 to 21 Jul 2012*

*Age 80.7yrs to 82.1yrs*

This is a challenging period of life during which you are forced to slow down and make sure that the foundations of your life are solid. It is the ideal time to make changes in your diet and exercise regime, and to have a health check.

If you were born during the night then you experience this around 49 or 50 years old. You may have the responsibility of caring for aging parents. Subtly the roles have been changing over the past few years and now you realize that you need to take charge. If your parents are not involved, then other responsibilities are likely to arise. If you have always been a responsible person then perhaps it is now time to learn to care for yourself, put yourself first and achieve some of your own ambitions. If you have led a carefree life then perhaps you will now find settling down more rewarding. Only you can know the answers, however the lesson is clear - put the effort in now to reap the rewards later.

If you were born during the day then you experience this period when you are 5 years old. The structure of your life is changing. It is time to separate a little from your parents and settle in to your school life. The planet Saturn and the Sun may be a challenge in your birth chart. As such you may experience this period as a difficult one in relation to your father, or another male authority figure in your life. It is a time when your father needs to offer support and guidance rather than imposing his will on you. As a result you learn healthy limits while still feeling able to express your own needs.

**Planetary Period: The Sun subperiod Jupiter**

*From 21 Jul 2012 to 25 Dec 2013*

*Age 82.1yrs to 83.6yrs*

Generally speaking this is a fortunate period whether you experience this period at the age of 7 or in your early 50s.

As an adult your fortunes improve in all areas of your life, but particularly in health and wealth. As a result you are happier, which in turn attracts more opportunities for expansion and quality of life. You are delighted to be achieving your goals. This is particularly so if you have used the last year or so to work towards your goals. If you have tried to cut corners then you may now be required to correct some of your errors. Hopefully you have used the previous period to lay some solid foundations and now you can fully reap the benefits. Your colleagues, friends and family are likely to hold you in high esteem right now, recognizing your true worth. This period is likely to be a highly beneficial one, but there are some exceptions. If you have acted immorally in previous periods of your life then ancient astrologers state that you could have a spectacular fall from grace. If you have acted with integrity throughout your life then you are likely to easily attract good fortune.

At the age of 7 you are likely to enjoy your life. Having settled into a new routine now you can relax and enjoy new experiences. It is possible that you spend time with your grandfather or his side of the family. You may enjoy your schoolwork; discover a new hobby or a new circle of friends.

#### **Planetary Period: The Sun subperiod Mars**

*From 25 Dec 2013 to 31 May 2015*

*Age 83.6yrs to 85.0yrs*

The planet Mars often indicates a change of direction. So now is the time for you to make changes so that your life is more truly reflective of your personal goals. Are you living the life that you have really wanted to? If so then this is an opportunity to really forge ahead with your ambitions. If not, then you need to reassess.

If you have a "nocturnal" chart then you are likely to be restless, yearning for some excitement in your life. You may make some sudden change, or a twist of fate may surprise you. If you are single then perhaps you marry during this time, or travel to a far off land. Ancient astrologers warned of quarrels with animals and people. Therefore you need to be wary of abusing those around you in your efforts to get ahead. You may be restless, but your loved ones may not share your enthusiasm for greener pastures. Weigh up the consequences of any actions as well as you can before proceeding.

If you experience this period as a child then you are likely to also be enjoying new activities, perhaps associated with animals. This will depend on other aspects of your birth chart.

Whether born during the night or the day, you are likely to experience a sudden change of fortunes towards the end of this period. This will test your true mettle. The process of self-discovery may be somewhat challenging, but you are likely to rise to the occasion.

#### **Planetary Period: Venus**

*From 31 May 2015 to 21 Jul 2016*

*Age 85.0yrs to 86.1yrs*

The ancient astrologers consider the planet Venus to have a very positive influence on people's lives. Therefore, they say that this is a happy period of your life whether you

experience it at the age of 10 or 54. Either way you are joyful, enjoying pleasurable pastimes in solitude and company.

As a child, your family's financial circumstances are likely to improve. As a result you are likely to enjoy more material comforts. Perhaps you will also start receiving your own pocket money and therefore delight in some financial independence.

As an adult your income is likely to increase, therefore giving you even more reason to rejoice. If you are single then you are likely to be introduced to someone significant, perhaps even more than one person. You may have a choice. If you are married then you are likely to enjoy a new period of romance and pleasure with your spouse. You may discover an artistic talent during this phase, or perhaps you will simply take greater pleasure in your current tasks. People in high places are likely to help you achieve your desires. Right now you can enjoy yourself, so make the most of the opportunities that come your way.

### **Planetary Period: Venus subperiod Mercury**

*From 21 Jul 2016 to 12 Sep 2017*

*Age 86.1yrs to 87.3yrs*

Whether you experience this combination of planets at the age of 11 or 55 it is difficult to focus on practical matters right now. You are more likely to be distracted by the pursuit of pleasurable activities or enjoyable friendships.

As an adult it is time to reassess your options, in particular those relating to friendships and finances. Friends may be somewhat unreliable during this period. You need to apply reason rather than emotion to those close to you. Your loved ones may be undergoing a period of personal upheaval that is affecting their relationship with you. You need to reassess whether or not the changes are permanent or temporary. You may also discover an artistic talent such as writing, acting, drawing or teaching. It is possible that you are also changing your mind about how you earn your money. Consequently you may change jobs. You may even move to another country in pursuit of a better lifestyle or a loved one. Try not to be too scattered during this period. If you can remain calm and make logical choices then you are more likely to achieve emotional satisfaction in the next phase of your life.

As a child you may have the opportunity to enjoy new hobbies, join a club or even change schools. Whatever the scenario you are now able to fully enjoy your pastimes and friends.

### **Planetary Period: Venus subperiod The Moon**

*From 12 Sep 2017 to 3 Nov 2018*

*Age 87.3yrs to 88.4yrs*

Femininity is highlighted during this phase. Whether you are male or female, 12 or 56 years old, you are likely to be drawn to women and the feminine arts. The Moon and the planet Venus are combining to entice you to enjoy your life more. Pleasurable activities are likely to hold more attraction, particularly feminine ones such as beauty treatments, the arts and fashion.

As an adult you are feeling much happier now because you have able to concentrate on one thing at a time. Life has been a bit confusing in the past year or so, but now you are starting to settle down and reap the benefits of your past decisions. This is likely to be a happy phase of your life during which your friends, colleagues and loved ones appreciate and support you. In turn you are able to enjoy their company. Your social standing may improve reaping

benefits for your private and professional life. If you are married then your relationship with your spouse is likely to blossom during this phase. If you are single then you may meet someone significant, perhaps even plan an engagement or marriage. Finances are also likely to improve now adding to your personal satisfaction. In a woman's chart this can indicate a beneficial time to have a health check.

As a child you are likely to be feeling the first stirrings of awareness of the opposite sex. Your social circle is changing, as are your expectations of friends. Perhaps love is in the air, or perhaps you are simply challenging your own beliefs about gender. As a young girl this is a beneficial time to learn about the cycles of the female body.

**Planetary Period: Venus subperiod Saturn**

*From 3 Nov 2018 to 26 Dec 2019*

*Age 88.4yrs to 89.6yrs*

The focus is currently on how comfortable you feel with the people in your life. Your relationships with friends, relatives and your primary partner need to be consolidated. If you neglect your loved ones right now, then it is at your own risk.

If you were born during the day then you will experience this when you are in your mid-teen years. As such your circle of friends may change during this period. It is also possible that you form a deep and lasting bond with someone. This may be a friendship or it may be a bond that lasts for a long time, a mentor or friend who influences your life. It is also possible that you change school or home. You may feel a little awkward or shy. Your challenge is to believe in yourself and your ability to form positive friendships with people of all ages.

If you were born during the night then you are likely to experience this in your mid to late 50s. Therefore you are likely to be reassessing your associations in the light of whether or not you wish to maintain a connection in the latter half of your life. Serious consideration needs to be given to past mistakes and current needs. You are also likely to reconnect with people from your past. This can be a pleasant or unpleasant experience, depending on the nature of the relationship. For instance if you are single then you may meet an old friend and marry. If you are single then you are likely to seriously consider your marital status. You will either decide to remain single and settle down happily on your own, or you may seriously search for a partner. It is also possible that you decide to end a serious personal or business partnership. If this is the case then you need to be very careful of legal ramifications. Legal matters need to be dealt with now. It is also time to get serious about your finances. Your financial security and independence can be attained now by careful planning and action.

**Planetary Period: Venus subperiod Jupiter**

*From 26 Dec 2019 to 15 Feb 2021*

*Age 89.6yrs to 90.7yrs*

You have just been through a somewhat serious period, during which you were reassessing your relationships. Now you can lighten up and enjoy a more favourable social life.

Whether you are a teenager or in your late 50s, the emphasis is on social contacts, expanding your hobbies and generally having some fun. It is time to try some new hobbies, set some new goals, reassess your finances and expand your horizons. You may travel, start a new study course or simply take ballroom dancing classes. Make sure that you enjoy whatever activity you choose. Otherwise you may have some difficulty settling down to the more serious tasks in your life. Satisfaction will come more readily if you set yourself some clear

goals, ones that incorporate achievement and fun. As your social circle expands and your self-esteem starts to improve then your self-confidence is impressive. You enjoy associating with people with common interests and goals, and they also enjoy your company. If you have had aspirations to hold a prominent position in society then now is the time to seek support for your aspirations. Spread your wings and fly a little.

**Planetary Period: Venus subperiod Mars**

*From 15 Feb 2021 to 8 Apr 2022*

*Age 90.7yrs to 91.9yrs*

If the previous period was a time to spread your wings and fly a little, then now is a time to change direction. For reasons beyond your control others are no longer able to support you as much as they were. So you have to become a little more self-directed.

If you are experiencing this combination of the planets Venus and Mars at the age of 15 or 16 then perhaps you are striving for more independence, clashing somewhat with those in authority and having difficulty finding the right balance between self-assertion and consideration for others. It is also possible that your relationship with your father, or another significant male, is at the root of these challenges. You would do better to seek the counsel of a wise and trusted woman, rather than rely on the men in your life right now. It is time to find your own way through assertion not aggressions.

If you are experiencing this period during your late 50s then it is a time of conflicting desires when it comes to relationships. Perhaps your relationship with your father plays some part in this conflict, however; it is likely that you are undergoing a change of heart. You need to be wary of pursuing fame and fortune at the expense of your loved ones. During this period you need to reassess your most important relationships, the way that you relate to your loved ones and the time that you allocate to those closest to you. If changes need to be made then now is the ideal time. Otherwise you are likely to experience problems, particularly in your relationship with women. It is not the right time to be entering into a senseless battle of wills. Or as advice columnist Ann Landers said, *"All married couples should learn the art of battle as they should learn the art of making love. Good battle is objective and honest, never vicious or cruel. Good battle is healthy and constructive, and brings to a marriage the principle of equal partnership."* Right now the concept of equal partnership is being thrust on you in all areas of your life. You would be wise to take heed.

**Planetary Period: Venus subperiod The Sun**

*From 8 Apr 2022 to 31 May 2023*

*Age 91.9yrs to 93.0yrs*

This period is one in which you reap the consequences of previous decisions. If you have applied yourself to acting responsibly then you are likely to enter the next phase of your life with the support of loved ones, and the knowledge that you have done your very best.

If this is occurring in your teenage years then perhaps you are facing decisions regarding your future choice of work, as well as the type of relationship that you would like. If you are currently in a relationship, and you have not allowed it to detract from your studies then you are likely to benefit from your choice. However, if you have allowed yourself to be misled against your own morals by a lover then you now have to face the consequences of those decisions. The more that you embraced the lesson of equal partnership and responsible action in the previous phase, the more positive choices you have available to make now.

If this is occurring at the age of 60 then you also now realize that you soon have to make decisions and changes and these are largely affected by past actions. If you have been clashing with other people in previous years, and acting with integrity then now you may be ready to move on, knowing that you have done your best.

On the whole this is a positive phase, so it is unlikely that you experience dire consequences. In fact you may reap many rewards. This can be a very happy time of life, during which your good fortunes are multiplied. Ancient astrologers say that you may be the victor over your adversaries, and that you will be associated with kings and queens and rise in nobility and power!

Whatever your age now is the time to take stock of your finances and the lessons learnt regarding relationships, and prepare for a new phase of your life.

### **Planetary Period: Mercury**

*From 31 May 2023 to 8 Apr 2025*

*Age 93.0yrs to 94.9yrs*

You may experience the influence of the planet Mercury at the age of 18 or 62, depending on what time of day you were birth. Either way, you are about to undergo some changes in your lifestyle. This could be in your daily life, or perhaps in your profession. It could simply be a change of pace, or a more significant change in your life. Perhaps you begin a study course, or move to another neighbourhood. This is the ideal time to learn new skills and how to apply these skills whether you are planning the start or end of a career or lifestyle. You may a choice of several options which you find exciting and stimulating or you could feel restless and unsure of your course of action. Remind yourself that change can be refreshing and exciting.

Ancient astrologers say that the strength of your planet Mercury will determine the outcome of this period. If you have a good, strong Mercury then you are likely to enjoy the changes that occur, however; if your planet is debilitated in some way then you may struggle with your lessons. Either way you need to explore options and remain open to new possibilities. Feel free to change your mind, but not so much that indecision and changeability hinders your chances of success. Do not squander your opportunities. You need to make decisions that help you focus on the here and now, and not the past.

### **Planetary Period: Mercury subperiod The Moon**

*From 8 Apr 2025 to 15 Feb 2027*

*Age 94.9yrs to 96.7yrs*

Whether you are young or old when you experience this period, you could feel a little unsettled. Something or someone may be compelling you to make changes. It may even be the voice of your own conscience that is urging you to try new things. Either way it is time to embrace these opportunities to change your habits or lifestyle even if you don't know where to start. Just take things a step at a time, but don't dig in your heels and refuse to change even if at times you perhaps feel a little overwhelmed. Try to make decisions that increase your sense of wellbeing. In other words, rather than reacting with heightened emotions try to concentrate on making a calm, considered response. A significant female relative or friend could call on you for support. Once again you may not welcome this cry for help. Do what you can to help but ensure that you also take good care of your own mental health.

It is fair to say that the more that you enjoy yourself and try to forget your troubles, then the

more that you can enjoy this strangely erratic period of your life. Eat, drink and be merry and make sure that you don't become careless or reckless. You may feel unsettled if you try to commit to one path. This is more likely to be a time when you want to explore all of your options. Follow your intuition because on a more positive note you have many opportunities to enjoy different aspects of your life. Your career choices may become more stimulating, offering you a chance for a change of scenery. If you are single you may meet a significant partner, someone who challenges you to make different choices in your life. If you married then you and your partner may need to learn different ways of communicating or start a new hobby. You may make decisions that affect your loved one, or vice versa. If you experience the influence of these planets during your sixties then you may decide to retire from your job. This period can be both unsettling and exciting.

### **Planetary Period: Mercury subperiod Saturn**

*From 15 Feb 2027 to 25 Dec 2028*

*Age 96.7yrs to 98.6yrs*

After a period of experiencing many opportunities and options, and perhaps feeling a little tense, you are now able to settle down. You have a clearer picture in your mind's eye of the opportunities that abound in your life and now you are required to make some choices. It is time to seriously consider various aspects of your life.

If you were born during the day then you are experiencing this period during your early twenties, and you may face choices about jobs and careers. It may be time to sign a work contract, move home in order to accept a job offer or accept more responsibility in your current job. You are unlikely to receive promotions or recognition right now. Instead you are doing your apprenticeship, putting in the effort that will reap rewards later. You may decide to strike out on your own, setting up your own business. Right now you are required to put in work behind the scenes, make careful plans, market and promote your product without necessarily seeing instant results. If you have done your homework then persistence is likely to pay dividends in the long run.

If you were born during the night then you experience the influences of these planets in your mid-sixties. If this is the case then you are likely to be making some serious decisions regarding your retirement. Either way it is now decision-making time. You need to commit to a particular course of action, or perhaps to another person. When faced with life-changing decisions you may have to face your fears and determine the difference between realistic caution, and unfounded fears that are standing in your way. Contracts are likely to feature, and you may need to make plans and decisions regarding your finances and investments.

On a slightly different note, ancient astrologers say that this can be a time of moving to another country, a long journey. Whatever your course of action you are sowing the seeds now in order to reap the benefits in the next period. As Susan Jeffers says in her best-selling book title, "Feel The Fear and Do It Anyway".

### **Planetary Period: Mercury subperiod Jupiter**

*From 25 Dec 2028 to 3 Nov 2030*

*Age 98.6yrs to 100.4yrs*

You can now reap the benefits of the past year or so. Hopefully you have been working hard and shouldering your responsibilities. Right now you can see light at the end of the tunnel. You are likely to have an active mind during this period as well as a yearning to expand your horizons.

If you are experiencing the influence of these planets in your 20s then you are likely to reassess your hopes, dreams and wishes and to enlist the help of your peers and elders. An event may trigger a change of heart and this is a beneficial time for receiving wise counsel from other people. If you are bored then it is time to plan a new and more satisfying lifestyle. You may be ready to travel, really enjoying the planning stages as much as the actual journey. During this period you could also receive some good news - a promotion, an award in recognition of your hard work, or a generous offer from an associate or friend. It is also possible that you make a joyous announcement or send out invitations for a celebration. This could include announcing your intention to marry or perhaps the birth of a new child or project. Promises are easily made, but keeping them is often more difficult. It is important that you are true to your word right now. The more that you honour your commitments then the more rewards you are likely to receive. These could include the opportunity to study, teach, write, and publish articles or travel.

If you are going through this phase in your 60s then much of the same is true, however; you are more likely to be considering how to make the most of your retirement. Travel plans may be highlighted, or you could be deciding how to spend your leisure time in other pursuits. Children may feature in your life now, as you enjoy being a grandparent or perhaps acting as a mentor for young people.

Either way this is a positive phase of your life during which you are encouraged to make the most of your opportunities.

### **Planetary Period: Mercury subperiod Mars**

*From 3 Nov 2030 to 11 Sep 2032*

*Age 100.4yrs to 102.3yrs*

Restlessness may be a key feature of this phase of your life. This is because you are ready for change but you are not quite sure what path to choose. Choices need to be made. As a result this can be a time of conflict, either within yourself or with other people. You need to move forward with your life goals, but if you cannot exercise tolerance then misunderstandings and arguments are hard to avoid.

You may be experiencing the influence of these planets in your mid-twenties. If so then you are likely to feel the urge for independence. It is time to pursue your own career path, move out on your own, travel, start your own family or business or any other venture that propels you into new fields. You would be well advised to heed the advice of wise elders, and to avoid wasting your time with people who do not have good intentions. Save your energy for those who are important to you. Try to improve the lines of communications rather than leap from one argument to another. Otherwise you risk doing irreparable damage to significant relationships.

If you are undergoing this phase of your life in your late 60s then you are likely to face a few tough decisions regarding your independence. Can you still afford to live in your own home? Do you need to move to smaller accommodation? Is it time for that world trip? Is there any paperwork that you need to address now? Are you spending enough time pursuing your own independent interests or are you looking after others?

This period can bring the need for difficult decisions. Ancient astrologers also state that this period can signify a change in your relationship with a parent or spouse. On a brighter note

you now have the energy and desire to sort out problems that have been lingering and to pursue your own personal goals. At first this freedom may be unheralded and unwanted, but soon you will revel in your newfound independence.

### **Planetary Period: Mercury subperiod The Sun**

*From 11 Sep 2032 to 22 Jul 2034*

*Age 102.3yrs to 104.1yrs*

The last year or so may have felt a bit challenging, but if you have faced the challenges and made the necessary changes in areas of your life, then you are ready to shine. Now life lightens up and some joy returns. Whether young or old, this is an exciting time of increased opportunities and creative ideas. Your social contacts are likely to increase. In fact all forms of communications are busy as you make plans, discuss ideas and network throughout your community of friends, family and colleagues. A project may boost your social standing and bring great personal satisfaction.

In your twenties these planets impress the need for change in your life. You may have felt that the last few years have already been changeable enough, but now you are ready to embrace the new adventures. You may need to consult an astrologer regarding which areas are highlighted during this period because connections to your Sun sign and the houses of your birth chart are significant. Traditional astrologers say that this period can highlight a change in the relationship with an older brother or gifts from elder statesmen.

In your early 70s this period is also one of change. At a time when you may feel like you would like a quiet life, this is unlikely to be the case. If you are healthy and active, then you are well advised to embrace this opportunity for stimulation and have some fun. This may also be your opportunity to teach the young ones a thing or two. Enjoy your grandchildren, or other people's children if you don't have any of your own. You have much wisdom and experience to impart and this is your time to bask in the sunshine of other people's appreciation.

### **Planetary Period: Mercury subperiod Venus**

*From 22 Jul 2034 to 30 May 2036*

*Age 104.1yrs to 106.0yrs*

Life continues on its merry way but now you are likely to attract more women into your life - friends, associates, female children and relatives. You may find that you feel somewhat alienated from men but will enjoy the company of women.

This is a significant turning point if you are experiencing this influence during your late 20s and early 30s. Decisions now, either your own or someone else's, are likely to affect the course of your life. Marriage may be significant with you either marrying, or forsaking a lover who lacks commitment. You are ready to make decisions regarding your love life, although others may not be quite so dependable. Focus on the type of union that you want and you may be happily surprised! Favours, promotions, ideas and rewards are likely to come from associations with women. Therefore you might like to explore making contacts with women during this period by joining women's groups or by working with or for women.

If you experiencing this period during your 70s then this is also likely to be a time when you are focusing on your marriage, your memories, relationships with loved ones and your finances. It may be time to make some financial decisions. Equity and property investments may need a little reshuffling to further enhance your lifestyle.

This is likely to be a busy period with a full social calendar. In many ways this period signifies the end of one phase of your life and the beginning of another. Right now you might be too busy to fully appreciate the significance of the changes, but later you are likely to reflect on this turning point.

### **Planetary Period: The Moon**

*From 30 May 2036 to 12 Sep 2037*

*Age 106.0yrs to 107.3yrs*

Change is the key factor in your life. Right now your life is about to change in ways that you cannot begin to imagine. This can be welcome, or it can be a little unsettling depending on other factors in your astrology chart. Your association with women continues in this period, but your life changes in other ways. You are likely to undergo a series of highs and low as you adjust to the changes. The rhythm of your life fluctuates. Some times you experience joy and some times sadness. It is somewhat like when a first child is born. This is both an exciting period during which you welcome a new soul into the world, experience intense love and joy however; there may also be a little sadness for an independent single lifestyle that is left behind.

If you go through this during your early 30s then you may decide to move house, get married, start a family, or renovate your home. If you already have children then you may have to focus more on them right now. You may also give birth to a new project, something close to your heart. You may also renovate or move house, form a strong bond with mentors and parents or make your life more comfortable in other ways. If you do renovate or move house then you are likely to benefit from the sale of property. You may also enjoy going on a holiday or moving to an entirely new location. You are likely to be healthy in mind and body and well able to make the most of the ebb and flow of your life right now.

If you were born during the night, then you are likely to experience the influence of the Moon twice in your life. Firstly as a young child, and then again in your mid 70s. If you go through this in your mid 70s then you are likely to feel an urge to change your living arrangements. The emphasis right now is on comfort. What makes you most comfortable?

The astrological house and sign of your Moon gives clear indicators of how you can make your life easy right now, the changes that you are likely to seek in your personal life. Contentment is the key.

### **Planetary Period: The Moon subperiod Saturn**

*From 12 Sep 2037 to 25 Dec 2038*

*Age 107.3yrs to 108.6yrs*

After a period of change you are now able to settle down. If you have been unsettled in specific areas of your life then you are now able to establish more routine and stability. This could be through a change of attitude, a change of circumstance or through the ability to now incorporate daily habits that are more stable and comforting. It is a beneficial time to break old bad habits and incorporate new, healthier ones. You now have the willpower to apply to anything that you set your mind to. Embrace activities, projects and people who boost your self-esteem. Rely on your own judgment, even in the face of opposition, and you are likely to succeed, even if it is a little hard going at times. It is important that you look for a sense of security in your own life rather than searching for someone else to satisfy your needs. You may make a commitment to a loved one, either an undertaking to shoulder responsibility or

perhaps a promise of marriage, however; you would be well advised to carefully consider any long-term commitment.

When the steady planet Saturn comes together with the changeable Moon, then the structures of your life could change. If you are experiencing this period in your early childhood then your relationship with your parents is likely to change, perhaps through the circumstances of their lives, or the addition of a brother or sister or the arrival or departure of another member of your family. It is even possible that your family moves house during this period. If you were born during the night, then you are likely to experience the influence of the Moon twice in your life. Firstly as a young child, and then again in your mid 70s.

If you were born during the day, then you live through this period in your mid 30s. As an adult in your 30s these changes could involve renovating your home, or moving to a different house. Your family structure may also change with the addition of a child. Whatever your personal circumstances you fare best when you shoulder your responsibilities, establish healthy habits and honour your feelings.

### **Planetary Period: The Moon subperiod Jupiter**

*From 25 Dec 2038 to 8 Apr 2040*

*Age 108.6yrs to 109.9yrs*

If life has felt a little onerous in the last few years then you are likely to welcome this period, which combines the positive planet Jupiter with the changeable Moon. It is time for you to spread your wings and fly a little.

If you were born during the night, then you are likely to experience the influence of the Moon twice in your life. Firstly as a young child, and then again in your mid 70s. As a child you are likely to enjoy a period of happiness in your home and family. A younger sibling may be born, bringing joy to your family. Alternatively you may bask in the attention of your parents or grandparents. As an adult you are also likely to enjoy peace and harmony in your personal life. It is a good time to enjoy pleasurable hobbies and pastimes and the company of loved ones.

If you were born during the day, then you are in your 30s during this phase. If you are a late developer then you could literally leave your family home, like a young bird flying from the nest. On the other hand you may decide to expand your own family, bringing a child into the world. You may decide to move to distant shores, either permanently migrating to another country or perhaps enjoying a shorter-term trip. You may also find joy in studying a subject that is close to your heart, either academic or spiritual, anything that broadens your mind and brings you comfort.

Either way this period indicates a happy, joyful conclusion to the past few years that have been more difficult. So, without being too grandiose, make the most of the opportunities that come your way.

### **Planetary Period: The Moon subperiod Mars**

*From 8 Apr 2040 to 21 Jul 2041*

*Age 109.9yrs to 111.1yrs*

This is a dynamic time. On the positive side you are undergoing changes in your personal life that are exciting and opening up new possibilities.

If you are living through this period in your mid 30s then you are likely to be restless, eager to move forward with your life goals. Perhaps you have moved into a new home, or neighbourhood and are enjoying exploring your new environment. You may also be renovating or redecorating your home, discovering the joy and stress of the changes. On the other hand events, or another person, may be unsettling right now. You are unsure, tentatively wondering if you are on the right track. It is time to reassess your emotional needs, your life direction and assert your needs. Aggression and other inappropriate emotional reactions get you nowhere right now. Rash decisions are likely to lead to trouble. You would do better to count to ten before responding to anything that stirs your emotions. However, you also are well advised to face the problems at hand, deal with them one by one and instigate the changes that put your life back on track. Once you have done this then you can spend the next five or so years working productively, rather than feeling angry because someone or something seems to be hindering your success. This can be a highly fruitful period if you are honest and focus on your long-term goals, rather than your short-term discomfort.

If you are going through this period in your late 70s then you need to be wary of becoming a grumpy old man or woman. This is your opportunity to assert your needs, without being aggressive. You can take up an active hobby that gives you an outlet for any frustrations that you may be feeling as a result of growing old. On the other hand if your health is not optimal then you need to alleviate your discomfort, change what you can and let go of the need to control what you can't change. It is time to adjust your expectations while also asserting your needs. If you were born during the night, then you are also likely to experience the influence of the Moon as a young child and the changes in your home life are likely to be influenced by your parents, or a male relative.

The adjustments made during this period are likely to affect the next five or so years of your life, so make sure that you are on the right track. As a result you can really bear fruit in the next few years.

### **Planetary Period: The Moon subperiod The Sun**

*From 21 Jul 2041 to 3 Nov 2042*

*Age 111.1yrs to 112.4yrs*

It is time to seek a better balance in your life. You have been through a few emotional challenges in the past few years. Now you are ready to shine. Hopefully you have overcome the obstacles, come to terms with past mistakes and are ready to move forward. Some schools of thought would say that this is a time when yin and yang are balanced in all areas of your life. As a result you feel as though you can accomplish many of your life goals. You can express yourself freely and honestly, finding a balance between being assertive and accommodating.

Ancient astrologers say that this period heralds a time of spiritual renewal, when you feel that you want to contribute to the world because of your own beliefs. They also say that you will have "dominion over men".

If you were born during the day then you are likely to fare better during this phase than if you were born during the night. This is a time of harmony, when you can enjoy your mid 30s and find peace and harmony. Your work and home life are harmonious. You may change jobs, or move house in order to seek greater satisfaction. You enjoy the changes.

If your chart is considered "nocturnal", then you are likely to experience the influence of the Moon twice in your life, firstly as a young child, and then again in your early 80s.

If you are going through this period in your early 80s then you may have some difficulty finding the right balance in your life. You need to take care of your health, and ensure that you are receiving the correct care from loved ones and professionals.

As a child, it is important your parents take extra care of your health by making sure that you overcome any bad habits and by taking proper rest. On a more positive note you are likely to benefit from changes in your life. These changes could include the birth of a younger sibling or perhaps starting school. Either way you are likely to enjoy the transition, make your parents proud and receive recognition and support for your efforts.

### **Planetary Period: The Moon subperiod Venus**

*From 3 Nov 2042 to 16 Feb 2044*

*Age 112.4yrs to 113.7yrs*

Recently you have been spending your time pursuing your personal goals and finding emotional satisfaction in your achievements. You may have also come to terms with past hurts, before moving forward with your own goals. Now it is time to review your personal relationships.

If you are in your mid to late 30s then you are likely to reassess your friendships, associates and loved ones in the light of emotional satisfaction. You are seeking more supportive and joyous relationships, particularly in your most intimate connections. Any positive and loving bond is likely to flourish during this period. On the other hand if someone is no longer a positive influence then you are likely to gently and lovingly sever ties, and move on with your life. You are now able to concentrate on areas of your life that give you pleasure, joy and many emotional rewards. You may also put some time and energy in re-organising your finances. If you have been saving for a special outing, item or change then you are likely to reap the rewards now. This is a popular and enjoyable phase of your life. Make the most of your opportunities by concentrating on the positive and ensuring that you attract abundance. Take time out for the simple pleasures in life. Make time to walk on the beach, feel the sand and water under your toes and search for seashells. Visit an art gallery with a friend or loved one and enjoy a cup of coffee. Do whatever gives you pleasure and include those you love.

If your birth chart is "nocturnal" then you go through this period in your childhood, or early 80s. Either way you are likely to benefit from any associations with women. Your health is likely to be good and you experience pleasure in comfortable surroundings.

### **Planetary Period: The Moon subperiod Mercury**

*From 16 Feb 2044 to 30 May 2045*

*Age 113.7yrs to 115.0yrs*

This is a changeable period during which you experience many highs and lows. You are reaching the end of one phase of your life and need to discard anything outdated in order to consolidate in the next period. This can include anything from outdated goods, to old bad habits.

If you are living through this period in your late 30s then you are now likely to be reassessing your personal life, knowing that you are soon turning 40. You are required to take a steadier course than you have in the last few years of your life. However this is quite difficult to do

because you are feeling far from steady. Life has been expanding and now you have many options. You are tempted to take them all. Part of you just can't say "no". Discipline is not easy now. Your emotions and thoughts are in a state of disarray. Others may give you sound advice, but you are reluctant to take it. As a result you may take be juggling too many tasks in your life. If you do not take control of your own destiny then something or someone else may force you to slow down. For instance, if you over exert yourself then your health may fail. Alternatively if you try to push business contracts, then legal matters may put a dampener on your projects. You can make the most of this erratic period by making a list of your priorities and paring down your activities. Make time for healthy pursuits. Try to sort out all contracts and legal matters in a detached and non-emotive manner. If you can put your emotions to one side then you are more likely to settle on a new balanced course of action. If something is really restricting your life then perhaps you need to walk away? However, make sure that you are making a balanced decision. If you can focus on the most important aspects of your life, rather than become distracted, then you are more likely to sail smoothly into the next phase.

If your birth chart is "nocturnal" then you go through this period in your childhood, or early 80s. Either way you are likely to experience a few highs and lows.
